

Admin Trainer Panel

/*

Author: Gunit Anand

Developed By: Gunit Anand

*/

Configurations:

1. **Path:** application/autoload
 - a. I have set the \$autoload['helper'] and \$autoload['libraries'] according to the usage.
2. **Path:** application/database
 - a. I have set \$db['default'] accordingly.

Controllers:

Note: I have named all the controllers with the name relevant to the functioning of the controller with “cnt” as its suffix. For example, if the controller is for the test then “testcnt” is the name of the controller.

1. **Path:** application/controllers/Welcome.php:
 - a. It is for the home screen for the trainer.
2. **Path:** application/controllers/batchcnt.php:
 - a. It is controller of the batch and batch related functions.
3. **Path:** application/controllers/hello.php and Path: application/controllers/logincnt.php:
 - a. Ignore this file or delete it. It was there for testing.
4. **Path:** application/controllers/modulecnt.php:
 - a. It is controller of the module and module related functions
5. **Path:** application/controllers/questioncnt.php:
 - a. It is controller of the question and question related functions
 - b. Contains the options related controls too.
6. **Path:** application/controllers/levelcnt.php:
 - a. It is controller of the question level and question level related functions
7. **Path:** application/controllers/studentcnt.php:
 - a. It is controller of the student and student related functions.

8. **Path:** application/controllers/studentcnt.php:
 - a. It is controller of the student and student related functions
9. **Path:** application/controllers/testQuestioncnt.php:
 - a. It is controller of the questions of the test for inserting question in a test and related functions.
10. **Path:** application/controllers/testcnt.php:
 - a. It is controller of the test and test related functions
11. **Path:** application/controllers/topiccnt.php:
 - a. It is controller of the topic and topic related functions.

Models:

Note: I have named all the model with the name relevant to the functioning of the model with “_model” as its suffix. For example, if the controller is for the test then “test_model” is the name of the controller. Working is for similar sets as shown above in the controllers part.

Assets:

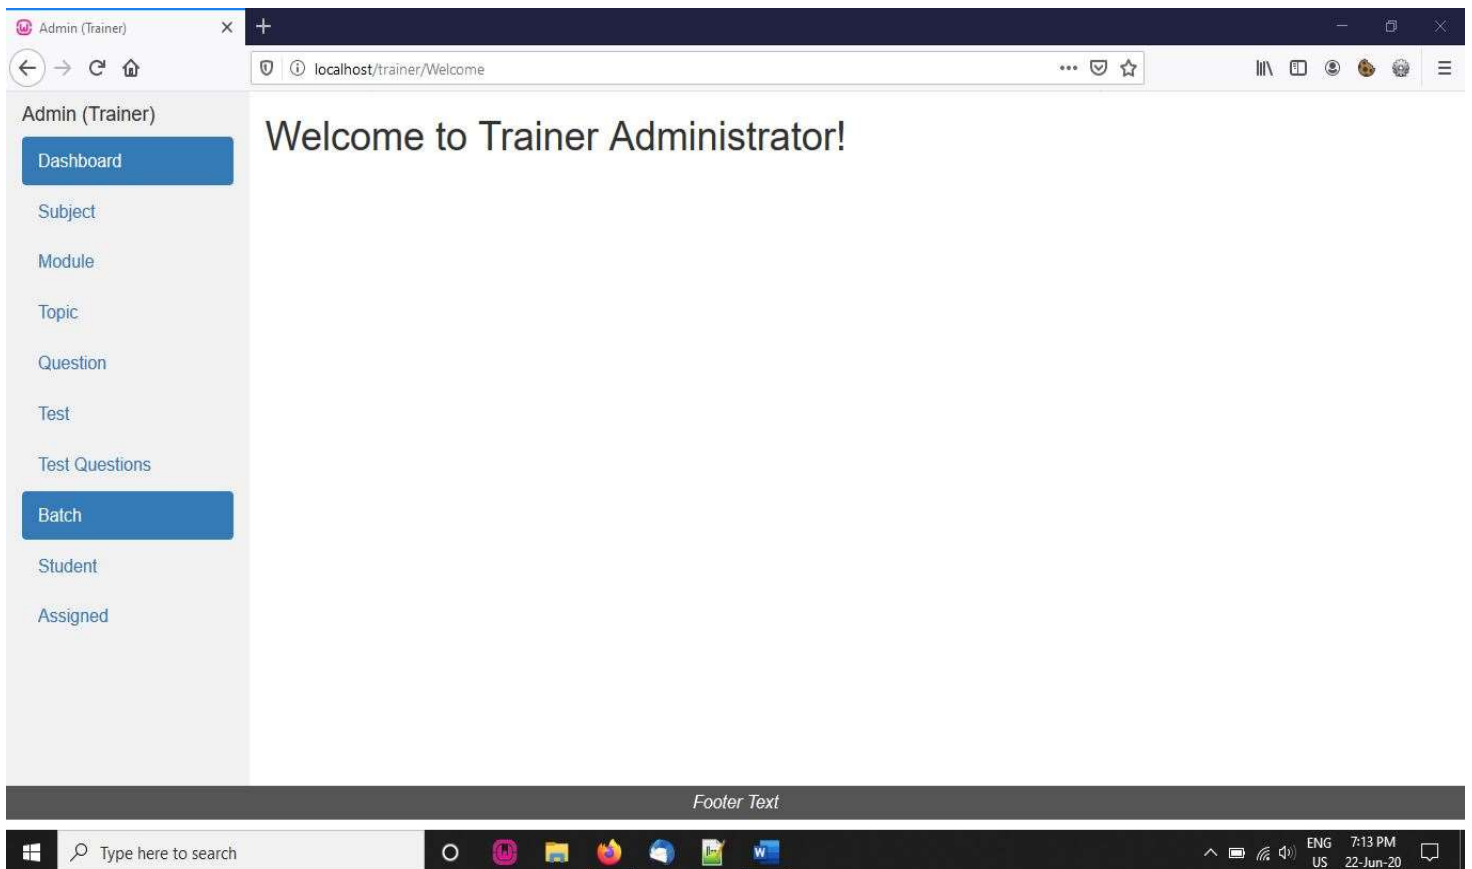

Note: I have created the style sheet and the relevant styling files are present in assets/template/css and the relevant javascript files are present at assets/template/js. Also, the header and footer file is included in every view file and are present at assets/template/header.php and assets/template/footer.php.

Views:

Note: I have named all the views with the name relevant to the functioning of the view with “List” as its suffix for displaying the list of the relevant data as conveyed by the name of the file (For example, “batchList.php” is for displaying the list of batches) and named “Form” as suffix for creating the specific data as conveyed by the name of the file (For example, “batchForm.php” is for creating batches).

1. **Path:** application/views/welcome_message.php:

a. It is for displaying welcome message on the screen for the home page.

2. **Path:** application/views/subjectList.php:
- a. It is for displaying subjects.

The screenshot shows a web browser window with the address bar displaying `localhost/trainer/subjectcnt`. The page title is "Subject". On the left, there is a sidebar menu for "Admin (Trainer)" with options: Dashboard, Subject (selected), Module, Topic, Question, Test, Test Questions, Batch, Student, and Assigned. The main content area displays a table of subjects. At the top right of the table area are buttons for "Delete" and "New Subject". The table has two columns: "Subject Name" and "Action". The "Action" column contains "Edit" and "View" buttons for each subject, along with a checkbox. The subjects listed are Chemistry, French, Mathematics, and Physics.

Subject Name	Action
Chemistry	☐ Edit View
French	☐ Edit View
Mathematics	☐ Edit View
Physics	☐ Edit View

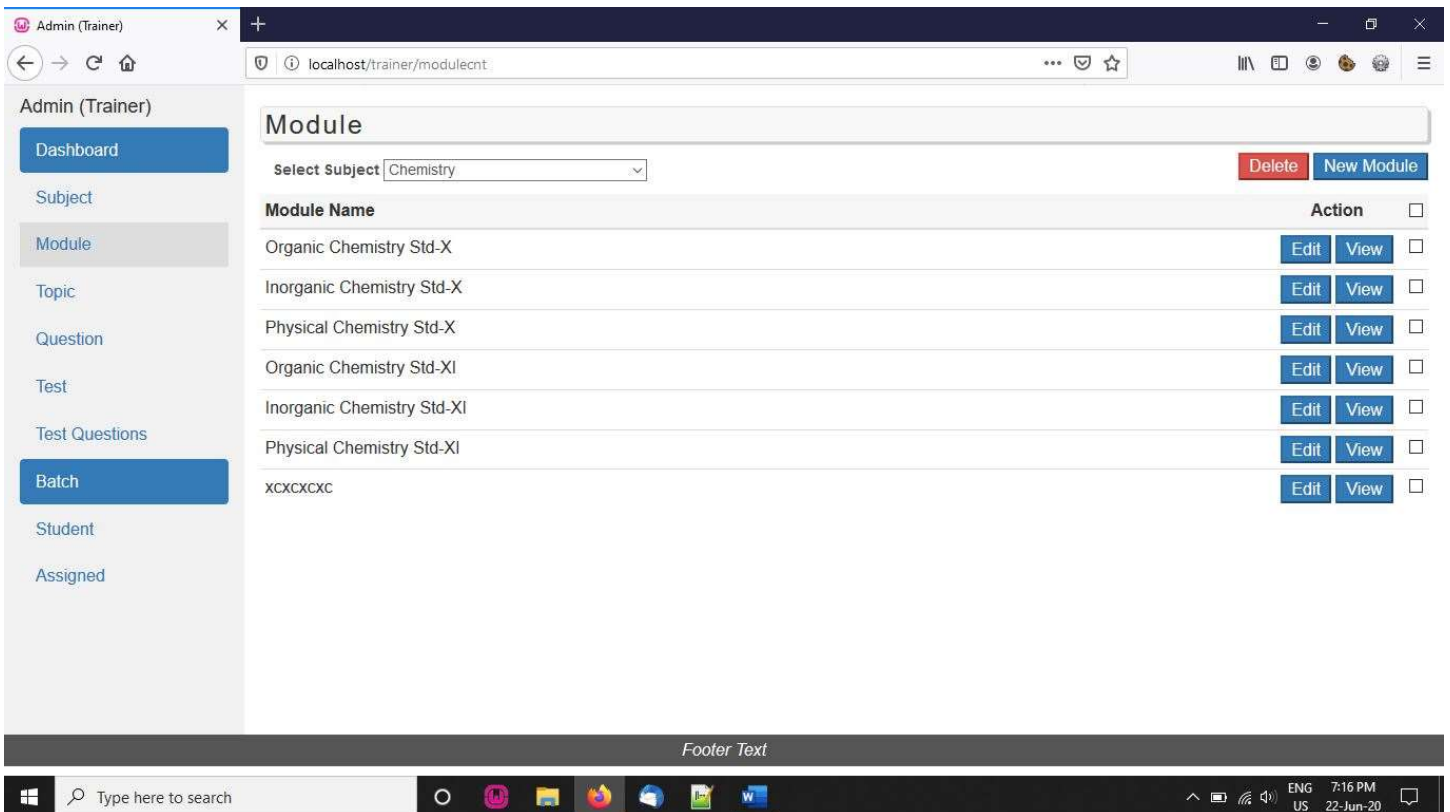

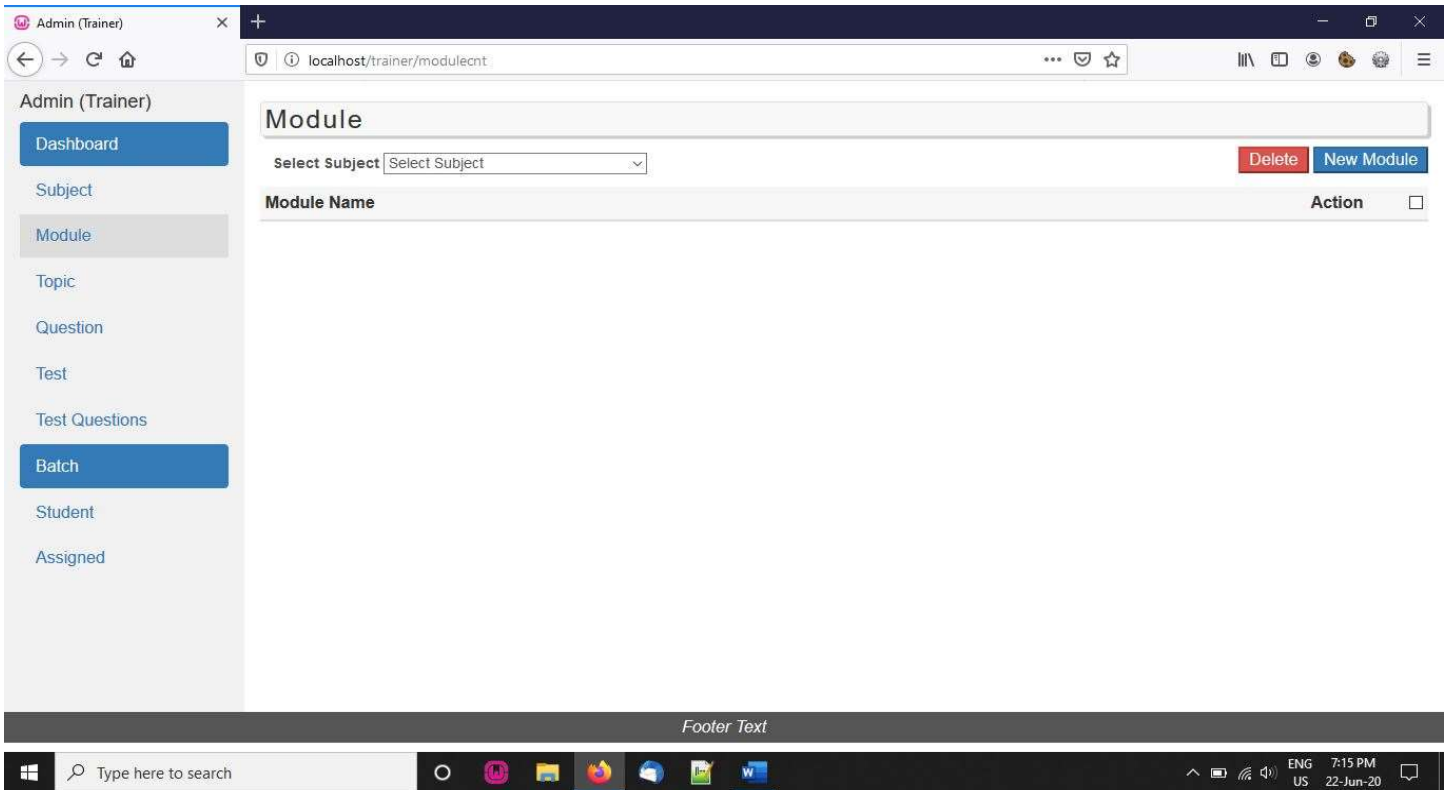

Footer Text

3. **Path:** application/views/subjectForm.php:
- a. It is for the creating subjects.

The screenshot shows a web browser window with the address bar displaying `localhost/trainer/subjectcnt/subjectForm?subject_id=0`. The page has a sidebar on the left with the title "Admin (Trainer)" and a list of menu items: "Dashboard", "Subject", "Module", "Topic", "Question", "Test", "Test Questions", "Batch", "Student", and "Assigned". The "Subject" menu item is highlighted. The main content area is titled "Subject" and contains a form with a label "Subject Name" and a text input field. Below the input field are two buttons: "Back" and "Save". At the bottom of the page, there is a footer area with the text "Footer Text". The Windows taskbar is visible at the very bottom, showing the search bar and several application icons.

4. **Path:** application/views/moduleList.php:

- It is for displaying modules.
- First we have to select the subject then only the subjects can be displayed.

5. **Path:** application/views/moduleForm.php:

- a. It is for the creating modules.
- b. First, we have to select the subject then only the subjects can be created.

The screenshot shows a web browser window with the address bar displaying `localhost/trainer/modulecnt/moduleForm?module_id=0&subject_id=2&subject_name=Chemistry`. The page title is "Admin (Trainer)". On the left, there is a sidebar menu with the following items: Dashboard, Subject, Module (highlighted), Topic, Question, Test, Test Questions, Batch, Student, and Assigned. The main content area is titled "Module" and contains two input fields: "Subject Name" with the value "Chemistry" and "Module Name" which is empty. Below these fields are two buttons: "Back" and "Save". At the bottom of the page, there is a footer area with the text "Footer Text". The Windows taskbar is visible at the very bottom, showing the search bar and several application icons.

6. **Path:** application/views/topicList.php:

- a. It is for displaying topics.
- b. First, we have to select the subject and then the module then only the topics can be displayed.

7. **Path:** application/views/topicForm.php:
- It is for the creating topic.

The screenshot shows a web browser window with the URL `localhost/trainer/topiccnt/topicForm?topic_id=0&subject_id=2&subject_name=Chemistry&module_id=1&modul`. The page is titled "Topic" and contains a form with the following fields:

- Subject Name:** Chemistry
- Module Name:** Organic Chemistry Std-X
- Topic Name:** (empty)

Below the form are two buttons: "Back" (blue) and "Save" (green). The left sidebar of the application shows a menu with the following items: Admin (Trainer), Dashboard, Subject, Module, Topic, Question, Test, Test Questions, Batch, Student, and Assigned. The "Batch" item is currently selected. The footer of the application displays "Footer Text". The Windows taskbar at the bottom shows the search bar, taskbar icons, and system tray information including language (ENG), time (8:12 PM), and date (22-Jun-20).

8. **Path:** application/views/questionList.php:

- It is for displaying questions.
- First, we have to select the subject, the module and then the topic then only the questions can be displayed.
- The “View” button shows the “options” of the question in a prompt(modal) along with the correct answer.

10. **Path:** application/views/testList.php:

- It is for displaying tests.
- You can assign the test to the batch or the student by clicking the “Assign” button and it will direct you to a modal. This modal will ask, the user that “whether you want to assign the test to a student or to the whole batch”.
- The below screenshots will show you

The screenshot displays the Admin (Trainer) interface in a web browser. The left sidebar contains a menu with the following items: Dashboard, Subject, Module, Topic, Question, Test (highlighted), Test Questions, Batch, Student, and Assigned. The main content area is titled "Test" and features a table with the following columns: Test Name, Marks, Duration, and Action. The table lists two tests: "End Semester" and "Mid Semester". Each test row has four action buttons: "Assign", "Add Questions", "Edit", and "View". A "Delete" button and a "New Test" button are located at the top right of the table. The footer of the page contains the text "Footer Text". The browser's address bar shows the URL "localhost/trainer/testcnt". The Windows taskbar at the bottom indicates the system time as 8:15 PM on 22-Jun-20.

Test Name	Marks	Duration	Action
End Semester	150	4	Assign Add Questions Edit View
Mid Semester	300	100	Assign Add Questions Edit View

When the user selects the batch/student from the modal prompt, then it will direct to the list of student/batch and there the student first will have to select the students/batches and then press the “Assign” button on the top right corner of the list, to assign the test to the particular students/batches.

11. **Path:** application/views/testForm.php:

a. It is for the creating test.

The screenshot displays a web browser window with the address bar showing `localhost/trainer/testcnt/testForm?test_id=0`. The page title is "Admin (Trainer)". The left sidebar contains a menu with the following items: Dashboard, Subject, Module, Topic, Question, Test (highlighted), Test Questions, Batch, Student, and Assigned. The main content area is titled "Test" and contains three input fields: "Test Name", "Marks", and "Test Duration". Below these fields are two buttons: "Back" (blue) and "Save" (green). At the bottom of the page, there is a footer bar with the text "Footer Text". The Windows taskbar at the very bottom shows the search bar, taskbar icons, and system tray information including language (ENG US), time (8:16 PM), and date (22-Jun-20).

12. **Path:** application/views/testQuestionHome.php:

- It is for the displaying the questions of a particular test
- This Page appears when you click the “View” button near the test

The screenshot shows a web browser window with the URL `localhost/trainer/testcnt/testQuestionHome?test_id=2&test_name=End Semester`. The page title is "End Semester". On the left, there is a sidebar menu for "Admin (Trainer)" with options: Dashboard, Subject, Module, Topic, Question, Test, Test Questions, Batch, Student, and Assigned. The "Test" option is selected. The main content area displays a table of test questions:

Sr.No	Question	Action
1	A compound is treated with NaNH_2 to give sodium salt. Identify the compound.	View
2	When chlorine is passed through propene at 400°C , which of the following is formed?	View
3	How many Hydrogen atoms are there in CH_3OH ?	View

Below the table is a [Back](#) button. At the bottom of the page, there is a footer with the text "Footer Text". The Windows taskbar at the bottom shows the time as 7:03 PM on 23-Jun-20.

13. **Path:** application/views/testQuestionList.php:

- It is for selecting and adding questions to a particular test by selecting the relevant subject, topic and module from the drop-down list.
- First, we have to select the test, subject, module and then the topic then only the questions can be displayed and then you can select the questions and press “Add to Test” button to add the question to the selected test from the drop down.

14. **Path:** application/views/batchList.php:

a. It is for displaying the list of batches.

The screenshot displays a web browser window with the address bar showing `localhost/trainer/batchcnt`. The page title is "Admin (Trainer)". On the left, a sidebar menu lists various options: Dashboard, Subject, Module, Topic, Question, Test, Test Questions, Batch (highlighted), Student, and Assigned. The main content area is titled "Batch" and contains a table with the following data:

Batch Name	Action
Alpha	Edit View ☐
Beta	Edit View ☐
Gama	Edit View ☐

At the top right of the table area, there are two buttons: "Delete" (red) and "New Batch" (blue). Below the table, there is a footer section labeled "Footer Text". The Windows taskbar at the bottom shows the search bar, taskbar icons, and system tray information including language (ENG), time (8:17 PM), and date (22-Jun-20).

15. **Path:** application/views/batchForm.php:

a. It is for the creating batches.

The screenshot displays a web browser window with the URL `localhost/trainer/batchcont/batchForm?batch_id=0`. The page is titled "Batch" and is part of an "Admin (Trainer)" application. On the left, a sidebar menu lists various options: Dashboard, Subject, Module, Topic, Question, Test, Test Questions, Batch (highlighted), Student, and Assigned. The main content area features a form with a "Batch Name" label and a corresponding text input field. Below the input field are two buttons: "Back" and "Save". At the bottom of the page, there is a footer area labeled "Footer Text". The Windows taskbar at the very bottom shows the search bar, taskbar icons, and system tray information including the date and time (8:17 PM, 22-Jun-20).

16. **Path:** application/views/studentForm.php:

- a. It is for the creating students.
- b. First, we have to select the batch then only the students can be created.

The screenshot displays a web application interface for an 'Admin (Trainer)'. The browser's address bar shows the URL: `localhost/trainer/studentcnt/studentForm?student_id=0&batch_id=1&batch_name=Alpha`. On the left, a sidebar menu lists various options: Dashboard, Subject, Module, Topic, Question, Test, Test Questions, Batch, Student, and Assigned. The 'Batch' option is currently selected. The main content area is titled 'Student' and contains two input fields: 'Batch Name' (pre-filled with 'Alpha') and 'Student Name' (empty). Below these fields are two buttons: 'Back' (blue) and 'Save' (green). At the bottom of the page, there is a footer section labeled 'Footer Text'.

17. **Path:** application/views/studentList.php:

- It is for displaying students (which are linked batchwise).
- First, we have to select the batch, then only the students of the batch gets displayed.

The screenshot shows a web browser window with the URL `localhost/trainer/studentcnt`. The page is titled "Students" and features a sidebar on the left with the following menu items: Dashboard, Subject, Module, Topic, Question, Test, Test Questions, Batch, Student, and Assigned. The "Batch" menu item is highlighted. In the main content area, there is a "Select Batch" dropdown menu currently showing "Select Batch". To the right of the dropdown are two buttons: "Delete" (red) and "New Student" (blue). Below the dropdown is a table with the following structure:

Student Name	Action
--------------	--------

The table is currently empty. At the bottom of the page, there is a footer with the text "Footer Text".

The screenshot shows the same web browser window, but the URL is now `localhost/trainer/studentcnt?batch_id=1`. The "Select Batch" dropdown menu now shows "Alpha". The "Delete" and "New Student" buttons remain. The table now contains three rows of student data:

Student Name	Action
Aman	Edit
Rajat	Edit
Shekhar	Edit

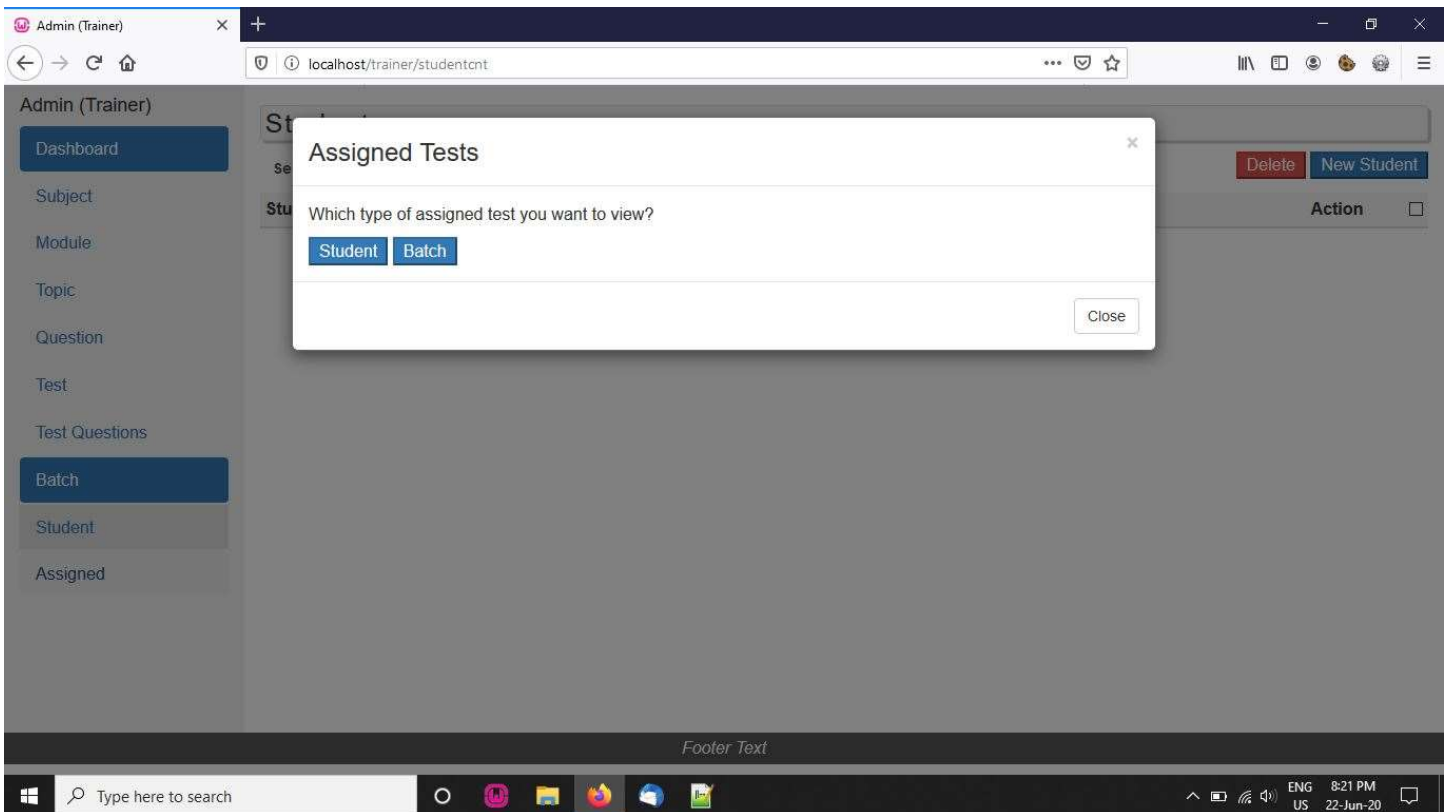

At the bottom of the page, there is a footer with the text "Footer Text".

18. **Path:** application/views/batchAssignmentList.php:

- a. It is for displaying the list of tests that have been assigned to the batches
- b. The “Assigned Tests” prompt appears only when you click on the “Assigned” menu on the side navigation bar.

19. **Path:** application/views/studentAssignmentList.php:

- a. It is for displaying the list of tests that have been assigned to the students

When the user selects the batch/student from the modal prompt, then it will direct to the list of student/batch and that have been assigned the test. There a person can also unassign the students/batches by first selecting the batch/student then press the unassign button on the top right, above the list of students/batches.

Database:

Note: Please don't use drop table on first time running the below content on phpMyAdmin as these tables were already created when I wrote the below database tables. The name of the database was "trainer".

/* This usermaster table was for my usage, it hasn't been used. You can ignore this table for now */

```
create table usermaster(  
    user_id int(6) not null auto_increment,  
    user_type char(1) not null,  
    user_name varchar(40) not null,  
    user_log varchar(40) not null,  
    user_pass varchar(20) not null,  
    PRIMARY KEY (user_id)  
);
```

```
drop table batch;
```

/* This table is for batches */

```
create table batch(  
    batch_id int(6) not null auto_increment,  
    batch_name varchar(40) not null,  
    PRIMARY KEY (batch_id)  
);
```

```
drop table student;
```

```
/* This table is for students and I have linked batch table with student tables */
```

```
create table student(  
    student_id int(6) not null auto_increment,  
    batch_id int(6) not null,  
    student_name varchar(40) not null,  
    PRIMARY KEY (student_id),  
    unique index(student_id,batch_id)  
)
```

```
drop table subject;
```

```
/* This table is for subjects */
```

```
