

CARRICULUM-VITAE

ADITYAMAL KUMAR

Shushan Lok 1, Gurugram Haryana Pin-122009

E-Mail - sonukr949 @gmail.com Phone: +91-8103340052,

CAREER OBJECTIVE

- Seeking an opportunity for working as professional in challenging environment and to utilize my education and skills for growth of organization and to learn how to motivate , improve on leadership quality ,improve creativity, and to establish myself as a competent professional

TECHNICAL SKILLS

- Development of IOT sensor and Gateway Hardware.
- RF design for Zigbee, Bluetooth, WIFI Module and Development of ARM controller.
- Development in C programming with STM cube IDE, Kiel Development Environment.
- Thorough knowledge of Embedded system Architecture with real time.
- Circuit simulation using proteus software tool, LT spice and NI multi sim.
- Debugging and troubleshooting of Embedded electronics circuit based on IOT.
- Circuit simulation using proteus software tool, LT spice and NI multi sim.
- PCB Schematic, library creation, foot print, wiring diagram design using Altium software as per IPC standard.
- Surface mount technology and SMD process, component selection as per design standard.
- Circuit design, analog electronics and digital electronics.
- Knowledge of emulator tool , Raspberry pi and Arduino software tool .
- Basic knowledge of protocols SPI, UART and I2C based on Internet of thing AND Embedded System.
- Online ups , SMPS power supply , inverter, e-rickshaw charger Design and troubleshooting .
- Fabrication output of PCB Gerber data and NC drill data.

CAREER HIGHLIGHTS AND EXPERIENCE

AMANTYA TECHNOLOGY, INC

March 2021 to present

Role – Embedded hardware Design Engineer

Responsibilities

- Planning design and engineering activities to be performed according to the project requirement.
- Provide support in the design and development and testing of RF frequencies.
- Hand on experience of signal generator and oscilloscope.
- Continue improving product quality and assess new Wifi/GPS RF chip set solution.
- Perform Hardware installation and validation of 5G SUB-6 and MMwave by using B210 NI RF board.
- Perform hardware design of RF Jammer and sensors.
- Perform PCB design on ALTIUM 22 and generation of fabrication output files for manufacturing.

CUBICAL LABORATORIES PVT.LTD.

Dec2019 to March 2021

Role – Hardware Circuit Design and testing engineer (R&D)

Responsibilities

- Hardware development and testing of circuit.
- Experience in circuit design ,printed circuit board schematic and layout development of multi layers PCB board.
- Experience in component selection and developing BOMs
- Maintaining the product standard through the complete product development.
- Perform validation and verification of complete hardware.
- Analyze and resolve all hardware test issue to provide state of arts products.
- Documented entire PCB Layout and fabrication on system.
- Coordinate with Supplier, Manufacturers and customers associated with Layout process.

HIPAD TECHNOLOGY INDIA PVT.LTD.

July 2018 to Aug 2019

Role – Troubleshooting and rejection control engineer

Responsibilities

- To minimize rejection of PCBA card on the job by testing and troubleshooting.
- Manufacturing execution system operation using software tools
- Printing of PCB and mounting process of SMD components using NXT MOUNTER.
- ESD protection, EMC and EMI

UTL PVT.LTD DELHI

Dec 2017 to June 2018

Role – service engineer

Responsibilities

- Testing of inverter, online UPS, SMPS charger card.
- Installation of solar and testing of e-rickshaw charger card.

VIMSONS ELECTRICAL PVT. LTD.

Jan 2017 to Dec 2017

Role- Graduate engineer trainee

Responsibilities

- Design and testing of electrical circuit using Proteus software tools.

Technical qualification:

- B.E (Electronics and Instrumentation Engineering) from Lakshmi Narain college of technology Bhopal , in 2016 [Affiliated by RGPV BHOPAL and AICTE Approved].

Academic qualification:

Course	Name of School / College	Board/ University	Percentage / CGPA	Year of Passing
B. E	LAKSHMI NARAIN COLLEGE OF TECHNOLOGY BHOPAL	RGPV University	68.80%	2016
HSC	R.S DEGREE COLLEGE	BSEB	60%	2012
SSC	SMT UDASI DEVI HIGH SCHOOL	BSEB	79.80%	2010

PROJECT UNDERTAKEN

Description:

Temperature controller

- It is an automatic temperature controller which control the temperature using temperature sensor LM35. An analog to digital converter 0848 to convert to convert the temperature recorded by the sensor into a digital quantity. Lcd for display and relays to turn the heater on or off.

Endo Activator

- The Endo Activator System is designed based on HOLTEK controller to provide BLDC MOTOR Speed according to PWM signal a safer, better, and faster way to achieve success in the following clinical applications-
- Debridement and disruption of the smear layer and biofilm
- Placement of calcium hydroxide and MTA around root curvatures
- Removal of residual obturation materials during retreatment procedures

DC-DC Convertor

- Convert up to 40 volt dc input to adjustable 3.3v, 5v, 12v and 15 volt dc and 3 Amp output using LM2576 step down buck switching regulator.

CLS PANNEL DESIGN

- This project is based on STM 32 controller which control 3 different ac as a analog input. STM32 compare with a minimum reference parameter and allow relay for switching load. GPIO pin used as relay and seven segment display

MAJOR TRAINING

Embed Vision Bhopal

- Training on PCB schematic design, PCB Library creation ,BOM creation and creation of foot print of electronic components using ALTIUM software.

EXTRA CURRICULAR ACTIVITIES AND ACHIVEMENTS

- Worked as Team leader in the minor training projects and enhanced people skills technique
- Participate in TEXAS INSTRUMENTATION.
- Member of debate organization committee in college.

STRENGTH AND HOBBIES

- Hard worker, positive thinking, quick learner.
- Having Excellent Communication Skills and can perform well in group activities.
- Playing cricket and watching movies

Personal information:

Father's name	Mr. Lalbahadur Singh
Date of birth	March 02 1995
Sex	Male
Language known	English, Hindi
