

ALEKH SHAH

Mobile: +919662530490

E-Mail: shah_alekh90@yahoo.com

Result-oriented professional with total 8 years of experience in Welding, Production and Quality. Having adaptive nature and ability to work in a challenging environment. Person with proven skills to explore in different fields in order to realize my potential as well as contribute to the development of organization with impressive performance. Have a potential ability for study and analyse the data. Aspire to take over career in digital industrial development by Artificial Intelligence, by using my technical and process resources.

ACADEMIA

- 2015** **M.E. (Welding Technology)** from M.S.University, Vadodara, with 66.11%.
2011 **B.E. (Mechanical)** from Babaria Institute of Technology, Varnama, Gujarat University with 63.64%.
2007 **XII** from Navyug Vidyalaya, Vadodra, Gujarat Board with 70.10%.

SYNOPSIS

- Exemplary communication skills & ability to think logically & ability to communicate orally and in writing.
- A strong mechanical and metallurgical background with a thorough knowledge of welding
- Capable of leading / prioritizing multiple projects to achieve desired results
- Demonstrated expertise in various welding technologies and processes with in depth knowledge of lean and manufacturing processes to eliminate the bottleneck and inefficiency
- carry full ownership for all welding related quality issues and drive to successful resolution and then ensure lessons learned are cascaded across all similar processes
- Key Skills(Knowledge)
 - Exposure in welding related activity for the equipment such as Pressure Vessel, Column, Heat Exchanger(Shell & Tube HE, Methanol Converter), Boiler(RG boiler, CG boiler, Synloop Boiler, steam drum); Support Structure; Piping System; Ship building (Bulbous bow, Propeller Bracket, piping spools etc)
 - Preparation of overall weld documents such as Weld Map, WPS, PQR, PWHT procedure, PTC procedure, WPQ
 - Code & Standard competency : ASME sec 2,8,9; ASME B31.3, AWS D1.1; API 934A, 934C, 582
 - NDT – RT, UT, PT, MPT.
 - Experience with welding processes, welding metallurgy, weld procedure qualification and testing of carbon steel, Low alloy steel and corrosion resistant alloys; brazing of Brass-Cu, Cu-CS, and Gunmetal-CS.

EXPERIENCE (8 years)

- COMPANY 3** : **L&T Ltd (6 years)**
DESIGNATION : **Sr Engineer(Welding Department)**
FROM : 10th July-2015.
TO : TILL DATE
- COMPANY 2** : **INOXCVA, KALOL (10 months)**
DESIGNATION : **PRODUCTION ENGINEER**
FROM : 6th sept-2012.
TO : 12th July - 2013
- COMPANY 1** : **PRABHA STEEL INDUSTRIES, VADODARA (1 year and 2 months)**
DESIGNATION : **Trainee**
FROM : 1st July,2011.
TO : 30th August- 2012

Experiences

L&T – June-2015 to March-2019 – L&T Shipbuilding, Chennai
April-2019 – till date – L&T Heavy Engineering, Surat

- Evaluate received supplier bid packages, designs and contract specific specifications on quoted programs and report recommendations in identifying various qualification requirement and raise critical aspects to concern department
- Welding consumable selection and calculation for each project and accordingly prepare welding material requirement sheet. Monitoring of weld material consumption for each project and analyse for deviations.
- Support in welding fixture layout preparation to mechanised the process to the maximum possible extent by using the latest technology
- Mapping of all weld procedure qualification, considering applied code and customer specification.
- Put together all metallurgical background, Code knowledge, Specification requirement, Product design, Process cycle in preparing all welding related procedures.
- Qualification of different brand of welding consumables.
- Design testing plan for validating weld integrity
- Assist field staff by identifying the correct weld procedures for each joints with the help of shop weld plan
- Participate in kick off meeting and verify prerequisite prior to new project execution
- Do surveillance for each project, to ensure compliance with welding procedures & welding parameters
- Issue welding sequence for critical joint
- Transitioning technical data packages, including complex drawing and specifications, into practical procedural instructions for welders, and arrange training activities for shop floor personnel.
- Working with a team of engineers and metallurgists to investigate and establish welding related failure investigations
- Use of statistical techniques for the analysis of data and the control of processes
- Reviewing mechanical, metallurgical and chemical testing results in conformance with International standards

Critical Achievements

- Qualification and Development of typical Inner Bore welding(IBW) for T#TS & Ferrule#Tube joint with complete mechanisation(First time in L&T Hazira)
- Qualification of welding consumable from different vendor to reduce overall cost of consumable
- SAW welding process implementation for saddle support
- Implementation of Nitrogen purging during PWHT to increase the life of TS & Tubes(First time in L&T Hazira)
- Trial of Full strength 32mm Groove type T#TS joint with mechanisation(First time in L&T)
- Development of ferrule welding of 2.6mm thick in a single pass with mechanisation(First time in L&T Hazira)
- Trial of TMT method for distortion control on 4mm plate(First time in L&T Chennai)
- Development of Dual cold wire FCAW process for lower thickness plate(First time in L&T Chennai)
- Development and execution of modified SAW process for lower thickness at erection area of ship construction(First time in L&T Chennai)
- Qualified welding procedure for DMR 249A(Naval grade, equivalent to ABA Russian grade being used for Submarines Hull) low alloy steel material having tensile strength of 600 N/mm² & Impact toughness of 78J at -60°C

INOXCVA, Kalol

- Line-up of processes(17 cycle) and manpower(68) and achieve efficacy in daily production
- Evaluate daily production as per the customer requirement(Benchmark of 4096 cylinders per shift)
- Schedule a preventive maintenance of plant machinery and auxiliary compressors for hassle free operations based on daily observatory records.
- Execution in box-up of different sized products for dispatch as per customer's demand.
- Perpetuate consumables usage and plan for procurement according to the project requirement.

Critical Achievements

- Involved in new line production development for the beer KEG.
- Developed mechanised autogenous TIG welding for KEG
- Successfully achieved pressure test of the 45 PSI of KEG..

Prabha Steel Industries, Vadodara

- Review of Production drawing for Fabrication and prepare Nesting, Welding, Production and Quality plan
- Evaluated design requirements for feasibility and plan for outsourcing activities
- Make preparatory arrangement inside rolled plate(fixture to avoid distortion) for welding
- Verification of pre-welding inspection stage
- Accomplish welding with an objective of productivity & quality improvement.
- Carryout in-process NDT & inspection as per the quality plan
- Prepare NDT report and analyse defect.
- Arrange quality stage inspection with surveyor and compose all require QC documents
- Construct final documentation as per quality plan.
- Execute inspection of outsourced equipment and prepare report.

Critical Achievement

- Heat exchanger projects for Reliance and IOCL
- Involved in prestigious project for fabrication of 45m of S.S.304 Distillation Column.
- Been a part of production team on repair projects for Reliance, IOCL, and GSFC
- Manufacture Boiler for Thermax Ltd

Additional Courses

- PURSUING ML with R & Python from online institute
- PURSUING LEVEL – 2 IN NDT (completed : RT , MT; Remaining : UT, DPT, VT)
- PRO-E software course (along with project work) from Hypersoft, Baroda.
- AutoCAD-09 certified by Autodesk (along with project work) from Hypersoft, Baroda.

KNOWLEDGE/EXPOSURE IN INDUSTRY 4.0

- Basic Knowledge of C Language, Python, R, ML Algorithm
- IOT enabled manufacturing process to help extensively in improving productivity & quality
- Welding process monitoring and analysis dashboard with the help of python & SQL
- Synchronizing different welding machine with IOT and integrate it with server for welding parameter
- Various position auto welding process with the help Fixtures, Positioners, Platforms, Columns, Gantry
- Welding control by Laser path tracking, servo controlled torch, synchronisation of tank rotator.
- Online monitoring of process for inspection and NDT.
- Use of additive manufacturing

SEMINARS/ PAPER PRESENTATION

- Presented on Cutting edge technology at QC meets, L&T Chennai - 2019
- Submitted a paper on Mechanization development in Hull Fabrication in L&T- 2019
- Awarded for Development of Mechanisation initiative- SMILE by L&T shipbuilding - 2018
- Presented for effective methods of improvements in shipbuilding at CII 18th skill development program at Kolkata - 2018
- Submitted paper on modified SAW process for lesser thick plate welding at L&T PI conclave-2018
- Presentation on Mechanisation in Erection joint at shipbuilding at L&T – Process Improvement(PI) conclave- 2017
- Presented on Development of welding procedure on DMR249A for naval application at IIW - 2015

PERSONAL DOSSIER

Date of Birth : 5th January 1990

Address : D/69 Sunderavan Society, Near Abhilasha Cross Road, New Sama Road, Vadodara - 390024.

Languages Known : English, Hindi and Gujarati.

Hobbies : Cricket; Chess, Swimming.
