

Professional Experience		
AMS Education Hub	June 20' – June 21' (12 months)	
As College Counsellor (Delhi)	• Assisted with admissions process , financial aid process and problems that arose	
	• Built and maintained relationships with college administration office	
	• Tracking sales or conversion data and works to meet quotas or sales team goals	
	•Analyzing trends, data, pricing strategies, and other information that can potentially improve sales performance	
	•Conducting extensive research on competitors' products and services.	
Educational Qualifications		
2021-2023	PGDM	MDI - Murshidabad
2017	B.sc chemistry (Honors)	Swami Shradhaanand College (Delhi University)
2014	Class XII CBSE	Rashtra Shakti Vidyalaya
2012	Class X CBSE	V.V D.A.V PUBLIC SCHOOL
INTERNSHIPS		
GCA (GLOBAL COMPOSTABLE ALLUANCE) Oct '21-Mar'22(6 Months)		
RESEARCH INTERN	•Building a database for material innovations in the compostable packaging domain	
	• Visiting universities/organizations to connect with new innovators in the compostable packaging domain	
	• Connecting with certifying agencies for compostable materials/lab testing facilities for material testing	
	•Analysing the Primary and secondary research findings , drawing inferences and conclusions in response to the research	
	• Working in the teams and Making LCA of different compostable materials	
	•Sometimes Planing and organizing own work and keeing the project managers informed of status and activities and how it will be going to help the project	
	• Completeing all assigned projects/tasks in line on time and Ensureing completeness, accuracy and appropriateness	
	• Analyzing and solving business problems using root cause analysis, hypothesis generation, survey design, benchmarking, and other qualitative and quantitative methods.	
	•Supporting in execution of the project plan and creating research deliverables, including but not limited to research studies, white papers, presentations and webinars, guidebooks, templates, how-to guides, articles, toolkits, etc	
	•Discovering and monitoring new innovations in the compostable packaging domain	
Data Projects		
AI impact	I have done the huge research to find out what all domains are mostly affected by the AI, Business and economy was most relevant after that I have gone through various research papers,sites , various sources and findind out various parameters from where I can get to know about the affect and collected the data from both Primary and Secondary research and for analysis i have done co-relation and regression to find out the how AI is impacting and will impact more.	
Data Scientist	Data collection and data visualisation was the major role , I have to collect the data from both Primary and secondary research . After Data collection, I have to use different tools, Power-Bi , Altryx,SQL for doing the proper visualtisation of the data by segregating different sections in differnt charts or graphs for proper decision making and to get exact knowledge of the research in simpler way.	
Data Analytics (used Cars)	I have applied supervised machine learning technique ,namely regression to predict the price of used cars. The data is real data which is collected from a car dealer in india. Different parameters of the car along with its selling price , purchase period (target variable) .The objectice of this project is to identify the most significant parameter that influence the selling price of the car , building a model out of it and validating the model	
Professional Certifications and Achievements		
• Pursuing Data Analytics Live project from UNSCHOOL		2022
• Acquired Digital marketing certification by Google		2021
Skillset		
MS Office (Excel etc.) PYTHON SQL SEO GABI Business Analytics Altryx Power -BI Pandas Tableau Pyspark		
Hobbies/Interest		
Cricket	I enjoy both watching and playing cricket during my leisure time.
