PROFILE

Pre-final year Computer Science Student specializing in Cybersecurity. Aside from my specialization, my interest is also in the fields of Web development, artificial intelligence, Iot and Cloud computing, and, also Linux and low-level programming.

My goal is to strengthen my ethical hacking skills and my knowledge of linux and low-level languages such as C, C++ and Assembly.

I am also interested in the rapidly growing domains of Iot, cloud computing.

SKILLS

Programming Languages / Tools – Python, Shell script, C, HTML, CSS, JavaScript and Web development frameworks, Assembly Language, Git, GCP, Java and Kotlin.

EXPERIENCE

1stop, Remote – *Trainee cum intern*

Duration – 2 months

OCTOBER 2022 – NOVEMBER 2022

- This was a training cum internship course.
- I learnt about ethical hacking, mostly hacking tools.
- For the internship, I created two projects on the topics – " Scanning using OWASP ZAP" and "Scanning for Open Ports and Attacking them".
- I also created reports for the mentioned topics.

EDUCATION

Bennett University, Greater Noida – *Bachelor of Technology*

2020 - 2024

I am currently in the 3rd year of my B.Tech. My major is Computer Science with a specialization in Cybersecurity.

PROFESSIONAL CERTIFICATIONS

- **Certified Network Defender** - EC-Council

Validity: November 15, 2022 - November 14, 2025

- **The UNIX Workbench** by John Hopkins University -
<https://www.coursera.org/account/accomplishments/certificate/YDYXX9HJRMUC>
- **Automation Scripts Using Bash** – Guided Project on Coursera
<https://www.coursera.org/account/accomplishments/verify/A2ASPVT2DQ8Z>
- **Architecting with Google Compute Engine** – Google
<https://www.coursera.org/account/accomplishments/specialization/certificate/KXABQDLRUMYQ>
- **Ethical Hardware Hacking** – Udemy (Kelvin C.)
<https://www.udemy.com/certificate/UC-47b19a19-50f8-4767-bc54-e510761911b7/>

PROJECTS

- **Terminal History Spoofer:** Spoofs your Linux terminal history for deception and safety reasons.
Link - [Github](#)
Note - This is still a work in progress.
- **Me6 – A Voice Assistant:** This is a simple voice assistant built using Python. It is capable of speech recognition. This was a project I made along with my team in the 1st semester of my B.Tech.
Link – [Me6 Github](#)
- **UP THE FIT – A Diet Planning Tool:**
This is a website that can be used for dieting and weight loss in a healthy manner. Weight loss has a major issue – nobody knows how to plan it. This is the issue that this website tackles. It was built using JavaScript, HTML and CSS.
Link - [UP THE FIT](#)
- **A simple Background video website:**
This is a website that I made only for testing purposes.
In the future, I will also be using it for practicing cybersecurity in a real environment.

Achievements –

- Scored A+ in the 5th semester end term for the specialization (Cybersecurity) subject.
- Participated in a few cybersecurity CTFs – Hackthebox cyber apocalypse 2023, picoctf.
- Finished an OverTheWire Wargame – Bandit (Linux skills needed)
