EXPERIENCE

YASH MOTORS, Surat, Gujarat

Jan 2018 - May 2018

Technical Engineer

- Check the air pressure in vehicle tires; and levels of fuel, motor oil, transmission, radiator, battery, and other fluids; and add air, oil, water, or other fluids, as required.
- Read service guides to find information needed to perform repairs.
- Test and charge batteries.

SHREE AMBICA SALES AND SERVICE (TATA MOTORS), Surat, Gujarat

Jun 2017 - Jun 2017

Industrial training and internship

- Repair or replace defective ball joint suspensions, brake shoes, or wheel bearings.
- Install or repair air conditioners and service components, such as compressors, condensers, and controls.

EDUCATION

Schmalkalden University of Applied Sciences (SUAS), Schmalkalden, Thüringen

Since Oct 2019

M.Eng. of Mechatronics and Robotics

- **Relevant Coursework:** Digital signal processing for filtering and amplifying the signal received from the sensor., Communication for fiber optics, wireless, duplex, and half-duplex systems., and Development of Mechatronic Systems: Taught about tools and basic project management with the use of V-Model

Project First one is XY-Pen Plotter

Apr 2020 - Oct 2020

- This prototype is implemented through the computer connected to the Arduino software that transmits the Arduino program from the processing software.
 - **CAD Software:** Solid work for the construction of parts.
 - **Programming software:** ARDUINO IDE Software for programming ARDUINO NANO for the operation of MG PM-DC motors.
 - **Slicing software:** CURA software is used to slice mechanical design and print in a 3D print.

Projects second one is Industrial Image Processing (Color Sorting)

Oct 2019 - Mar 2020

- Sort parts by the QR code's information and place them in a defined location, and if the information doesn't match the information stored on a computer, a part will be rejected.
- Color sorting with the help of a vision camera system through a robotic arm.
- During project performance, two types of camera systems were used.
 - **Keyence Vision Camera System**
 - **Omron Vision Camera System**

B.Eng. of Automobile

- **Relevant Coursework:** Vehicle dynamics for powertrain and brakes, suspension and steering, mass distribution, and aerodynamics., and design and analysis of automotive components according to industrial processes.

The project was on a belt-driven walking electric cycle

Oct 2017 - Mar 2018

- Developed a new treadmill electric bike, through unorthodox design in Autodesk Inventor, post-processing of the obtained voltage, elongation, and displacement analysis is also carried out in Auto-Desk Inventor.
- Build a vehicle that is faster than walking and easier to ride than a bike.

ADDITIONAL SKILLS

- MATLAB and Simulink (very good)
- Python (good)
- MS Office (very good)
- VMware Workstation (good)
- C and C++ (good)

LANGUAGES

- Hindi (native)
- German (negotiable)
- English (good)

Schmalkalden, Bhavikkumar Dholiya
