CARRIER OBJECTIVE

I am passionate about **Data Science** and want to see my career in this field. Being a student of Economics my primary task was to find **relations amongst the datasets and their variables**. Which helped in building my interest in **data and analysis**. I am currently seeking a position that can provide steady growth and learning opportunity to practice my skills and gain practical experience extensively.

CAPSTONE PROJECT

Retail Analysis

Problem Statement - Create a model to predict the potential demand of loan in each region

- Performed **Data Analysis** and **Data Manipulation**
- Deployed **machine learning models** to make prediction based on past data
- Created a **dashboard** in Tableau
- **Researched and mined data** while presenting the resulting model to key stakeholders

EDUCATION

6/2021 -
5/2022

Data Scientist
Simplilearn

Relevant skillset

- Python for Data Science | R programming | Machine Learning | Tableau | Big Data Hadoop and Spark developer

06/2019 -
07/2021

Master of Arts (Economics)
Symbiosis College of Arts and Commerce
CGPA - 8.56

Relevant coursework

- Statistics | Econometrics | Introduction to Research Methodologies | Data Analysis

TECHNICAL SKILLS

- Scripting language - Python , R , Scala
- Database - MySQL
- Data Preprocessing: Hive , Spark
- Messaging system : Kafka
- NoSQL Database : HBase
- Machine Learning - Linear/ Logistics Regression || Clustering || Classification || Ensemble Learning || Recommender System
- Visualization Tool - Tableau

KEY SKILLS

- | | |
|-----------------------|--------------------|
| • Data Manipulation | • Machine Learning |
| • Data Visualization | • Econometrics |
| • Data Preprocessing | • Statistics |
| • Feature Engineering | • Time Modelling |

PROJECT

- | | |
|---------------------------|-------------------------|
| • Loan Prediction | • Zinc Price prediction |
| • IBM Employee Attritions | • Sales forecasting |
