Summary

Professional with more than 3 years of experience in B2B & B2C Start-Ups in the domain of sales, operations & data/business analytics.

I've worn many hats in my career--Engineer, Sales Manager, Sales Operations and Data/Business Analyst. As a result, I have a unique ability to manage multi-disciplinary projects and navigate complex challenges. I have found that nothing satisfies me more than learning each and every day, meeting new people, developing new relationships, solving problems, and contributing to the growth of people. I believe that I have the ability to build a vision that inspires and with a determination that transpires into real-life examples. Going forward, I hope that my journey allows me to continue working with passionate people, driven by an idea to tackle the present world challenges in and out!
