

ELANGO VAN RANGASAMY *SIIRSM*

BE- Mechanical Engineering

IOSH MS / OSHA Certified / Offshore fit / BOSIET/ Level -6 International Diploma in Health & safety Engineering

Mobile: +91-9000413675, 8095258888 (INDIA),

E-Mail: elango19771@rediffmail.com / elango19771@gmail.com

BRIEF OVERVIEW

A competent leader with nearly 19+ years of cross-cultural experience in HSE and Quality Management in the Cement Plant, Power Plants, Oil & Gas drilling & process plants & Installations, EPC Construction of infrastructures in mega projects like OL2K(World Bank funding), Gathering center 2 in Kuwait (World Bank funding), PMC role in chemical plant in Jordan(World Bank funding), Major Civil & Mechanical constructions projects in India & Middle east.

Currently serving Limited, India as Deputy General Manager Safety - Integrated Cement Plant. ACC Competency in developing HSE Management system related to O&M, conducting compliance audits, advising on HSE requirements, statutory compliance and maintaining sound HSE standards as per Management system guidelines. Adept at developing safety plans, environmental management plans, overseeing implementation as well as conducting field safety survey, site safety surveillance and auditing for compliance. Demonstrated skills in relationship management and communication coupled with excellent analytical and leadership ability.

Played a key role in certification to ISO 14000 and Occupational Safety and Health and Environment auditing Hazard Identification, Risk Assessment, and Control, Environmental Aspects and Impacts Assessment, and Hazard.

Areas of expertise include;

- Environmental Management - Occupational Health & Safety Management - Project Management
- Statutory and Regulatory Compliance - Incidents Investigation - HAZCOM - HAZOP - TapRoot
- Project HAZID Studies - Environmental Surveys - Environmental Impact Assessment
- Emergency Response Programs - NM/SA/SC Closeouts - Quality Management
- Waste Management - Waste Disposal - HSE Coaching / Training - Arranging 3rd party Trainings
- Risk Assessment & Management- Proper reporting of Safety statistics as per SHEMS requirements

CERTIFICATIONS

- International Diploma in Health and Safety Engineering – European Safety Council (endorsed by Qualifi)
- Certified BOSIET and Offshore Fitness (OPITO).
- IOSH Certified on Managing Safely.
- Certified OSHAS 18001 Lead Auditor- LRQA
- H2S – OPITO Certified
- Post Diploma in Fire & Industrial Safety Management
- Certificated on ISO 14000, HAZWOPER, HAZMAT and HAZCOM.
- Certified on OSHA (30 Hours Course on Construction).
- Certified trainer on OSHAS 18001 by Bureau Veritas.
- Certified on Radiography Safety (NDT) By ASSE-KC.
- Certified on Basic Life Support and First Aid by Kuwait Ministry.
- Approved Safety Engineer by Kuwait national Petroleum Corporation, Saudi Arabian Chevron (SAC -Joint Operations) & KOC.

NOTEWORTH CAREER ROLES

Responsibilities

- Develop, implement and maintain the H&S management system related to Safety in O&M activities of Power plants.
- Maintaining High Safety Standard in the Power plant for day to day O&M activities like PTW, Employees & Associates trainings, PTW approvals, Preparedness & attending Plant emergencies, maintaining OSHAS 18000 certifications.
- Develop, implement and maintain the H&S management system in all respects to ensure risks to third parties / contractors / stakeholders are understood and controlled on a projects & plants to ensure that deliverables are issued on schedule, project milestone dates are met, and given tasks are completed within the allowed budget.
- Monitor external best practice developments and legislative requirements and translate these into the PMC H&S policy, ensuring continued compliance and industry leadership.
- Worked with peers in other disciplines to ensure coherent and integrated policies and systems are created that avoid unnecessary duplication and dissipation of effort
- Worked with the PMC Management Team to build knowledge and awareness of issues, approaches, techniques and methods.

- Assigning and Coordinating activities within the team to execute the design / procurement related activities of assigned projects
- Undertake H&S reviews of pre qualifications, tenders, proposed work packages, supplier proposals and start up meetings.
- Provide a source of specialist H&S advice and support to the programme. Performed safety studies such as QRA, FRA, HAZOP, HAZID, radiation and dispersion studies as project requirement or to assist management in decision making for safety related issues
- Identify potential and future strategic risks and how they should be minimised or eliminated.
- Developing of HSE / Loss Prevention Drawings Such As Fire & Gas Detector Layouts, Fire & Gas Cause & Effect, Fire Protection P&ID's, and Hazardous Area Classifications in projects and process areas.
- Provide credible expert representation of the PMC in industry forums and external bodies
- Monitor reporting arrangements and data to identify trends and early warnings of possible issues and recommend appropriate action to the PMC Management.
- Participate and envision H&S initiatives in order to promote continuous improvement of work standards and communication of best in class practices.
- Develop and approve strategic reports / documents

Key Competence

- Highly skilled in the analysis of technically demanding and detailed information and quickly identify the underlying issues and risks.
- Strong capacity to be future focused in identifying risks and implications.
- Well-developed communication skills to be able to put across complex concepts and data in a way that is readily understood and actionable using a variety of media.
- Skillful in engaging others with technical issues and maintaining their interest and enthusiasm.
- Skillful in distilling knowledge and building skills in others. And the capacity to be pragmatic and practical in the way that technical issues are addressed.
- Ability to produce analytical data and associated explanatory narratives
- Strategic and holistic thinker
- Understand and can apply a risk based philosophy whilst undertaking role in Assurance

Qualifications and experience in HSE

- Degree in Mechanical Engineering, OSHA 30, IOSH MS, OSHAS 18001 Lead Auditor.
- 10-12 years' experience on large construction projects in Oil & Gas, petrochemical Plants and Oil field drilling locations or similar role
- EPC construction experienced as PMC
- Membership to professional bodies like ASSE Kuwait Chapter, IOSH
- Excellent managerial and administrative skills possessing the ability to develop positive working relationships
- Proven network and outreach capabilities
- Excellent organisation skills with the demonstrated ability to effectively communicate internally and externally
- Excellent interpersonal, written and verbal communications skills with knowledge of essential PC and standard applications software's like HAZOP, HIRA, Online Safe Work permits, HSE People soft for STOP (BBS), Incidents, Near Miss, Injury, HSE statistics, CA/PA records.

CAREER RECORD

**Since January 2020 with ACC LTD (Lafarge-holcim), India
As DGM Safety – Integrated Cement Plant.**

ACC LTD is the Largest Private Multi national cement company in India owned by Lafarge-holcim, involving mining, processing, grinding and packing & distribution.

**May 2015 to Jan 2020 with JSW Energy Limited (JSWEL), India
As Safety Manager – 1460 MW Thermal Power Plant.**

JSWEL is the Largest Private Energy company in India involving in 60\$BUSD turn over around Globe.
Role is to maintain High safety standard in O&M activities of the Power plant including Fire & Safety Services.

**Nov 2013 to April 2015 with Larsen & Toubro Limited International, India
As EHS Manager – On Shore -125*2 MW Solar Thermal Power Plant Construction Project & Water Irrigation Projects. (World Bank & ILFS funding)**

Larsen & Toubro Limited is the Largest Private sector company in India involving in 100\$BUSD turn over around Globe.

**Jan'2013 to July 2013 with Oceaneering International, Dubai
As HSE Manager – Asset Integrity for Africa Middle East, FSU, Asia – To Cover On shore & offshore Oil Well Services of Inspections.**
Oceaneering International is an Global Inspections and Integrity Testing service provider
Of Onshore and Offshore Oil & Gas drilling & process facilities around Globe.

Nov'2011 to Nov' 2012 with Kentz Overseas Limited (UK Based Company) as Safety Manager
Kentz Overseas Being as Project Management consultant for construction of a 1 Billion USD Chemical plant in Jordan. (Bromine, CO2, HBr, KOH Environment) (World Bank funding),

Feb-2010 to Oct 2011 as Sr.Safety Engineer in NBTC Kuwait

To handle Design procurement and fabrication of 10000LBS crude storage tanks for SAUDI ARABIAN CHEVRON in Sub-Center 11 plant & Oil & Gas Drills. Implementing Chevron plant safety regulations.

Sept'08 – Jan'10 with NBTC Kuwait as Sr. Safety Engineer in KNPC Ahmadi Refinery

To handle project EPC for improvement in fire fighting facilities in Sabhan & Ahmadi refinery (Local marketing Units for KNPC).

This project under my safety advice and implementation of KNPC Safe work practices achieved **CMD AWARD** for the company in the year 2009.

Joined as Safety Engineer in NBTC – Kuwait (EPC Construction Company in Kuwait) from Nov-05 & promoted as Site HSE Manager in Dec'05 inside EQUATE Petro-chemical Plant.

To handling Equate Petrochemicals in OL2K Project. In this NBTC handled 41% of Mechanical & civil infra structures of entire 9 Billion USD OL2K Project. (World Bank funding)

Compiled all DOW and EQUATE Safety Regulations without any Incident.

Aug'02 – Oct'05 with Mahanagar Gas Ltd., Mumbai, India as Safety Engineer for Gas Plant and operations department.

(PNG & CNG Supplier for Mumbai – A Joint Venture of BG, GAIL & Maharastra State Govt. India); Golden Peacock Award Winner for Environmental Preservative Role

Sep'00 – May'02 with Kotak Urja Pvt. Ltd., Bangalore, India

(Solar Water Heater Manufacturer)

Joined as Quality Officer; promoted as Asst. Manager - Quality Control & Projects in Jun'01

Additional charge as ISO Coordinator after training in Indian Bureau of Management, Bangalore

COMPETENCY FORTE

- A. Health & Safety Management:** Developing Health and Safety management plans and overseeing implementation of the same as per the guidelines. Conducting safety inspections/audits, occupational health surveys, surveillance and field auditing for compliance. Preparing daily, weekly and monthly status reports to monitor the compliance. Devising and implementing emergency response plan for in-plant operations and construction sites. Participating and leading in change management and risk assessments. Conducting investigation of all incidents/ occupational health issues and suggesting recommendations. Developing Contractor safety management guidelines and number of safety motivational / training programs for improved safety culture within organization. Conducting regular Safety meetings with in the organization to improve HSE co-ordination among employees. Managing waste management and waste water treatment construction facility. Monitoring of air emission and waste water discharge. Supporting the Project Manager on leading plant Safety Management System under OHSAS 18000 and Environmental Management System under ISO 14000.
- B. Project Management:** Directing the entire gamut of project activities including working out various requirements with respect to utilities, aesthetics & monitoring overall project operations for ensuring timely completion. Accountable for project HSE planning, implementation and control. Supervising the complete operations. Overseeing the development of Documents, Instrument List/Specification and Block Diagram Loop Schematics related to HSE. Successfully liaising with process discipline to set start-up, shut down & operating sequences, instrument ranges, alarm/trip set points & control valve data for HSE. Spearheading and determining construction strategy (phasing), implementing project document control system for Health Safety and Environmental aspects. Process extensive technical knowledge and keeping abreast of govt. regulation, code of practices and standards.
- C. Environmental Management:** Overseeing establishment, certification and maintenance of the system and the required documents as per Environmental Management System. Reviewing policies /procedures and suggest improvements. Pursuing zero uncontrolled spills, zero environmental complaints and practicable zero harm to the environment. Ensuring environment legislative requirement compliance and documentation. Conducting Audits on Hazards & environment risk assessment, Updating and ensuring the compliance to legal requirements. Developing construction environmental management plan and ensuring adherence to operational environment standards, compliance assurance and documentation.
- D. Fire protection/Loss Prevention:** Coordinating and advising on fire fighting facilities/equipment management. Schedule/plan, functional testing, periodical maintenance, etc. Conducting audits / mock drills to ensure the fire prevention measures are in place and to identify the areas for improvement. Organising training for the personnel on emergency preparedness. Preparing of pre fire plans and mitigation measures, such as procurement of various equipment, organising mutual aid, etc.
- E. Quality Management Systems:** Promoting quality and performance improvement throughout the organisation. Serving as the Management Representative for ISO 9001, ISO 14001 & OHSAS 18001. Developing a framework of HSE Documents related to quality standards, procedures & systems and overseeing smooth implementation in shop floor and at supplier end. Assisting suppliers in revamping workflow processes for integration of HSE systems and effective implementation of Quality Management systems. Assessing the performance of the vendors based on various criterions such as percentage for rejections, quality improvement rate, etc. Planning & carrying out process audits at vendor's end for vendor qualification.
- F. HSE Documentation:** Compiling collating and analysing monthly reports. Overseeing preparation of necessary documents as per regulatory requirement. Maintaining environmental incident and near miss hazard register and a corrective and preventative action register. Investigating environmental incidents as required. Preparing budget proposal and controlling the budget. Maintaining project library or other system for maintaining ready access to all licenses, permits and other relevant documentation.
- G. Training:** Imparting safety induction training, permit to work training as well as portable gas detectors training to all supervisors. Training of personnel for use of fire protection systems, occupational health, emergency preparedness, etc. Conducting training on plant evacuation, and building fire alarms. Imparting training on HSE policies, procedures, loss prevention principles. Training of personnel on environmental awareness.

Machinery Handled:

Welding : TIG, MIG, CO2, SAW, ARC
Machining : Lathes, Cylindrical Grinding, radial drilling, Slotting M/c, VMC, VTC, Hobbing M/c,
Measuring Machines : Radiography, CMM, Vickers Hardness Tester, Trimass, Spectrometer, Optical Projector
And Measuring Equipment

TRAININGS ATTENDED

- ISO 14000, HAZWOPER, HAZMAT, HAZCOM by Oshacampus – TRAINING 360.
- Radiography Safety (NDT) by ASSE-KC.
- OSHAS 18001 Certified lead Auditor by LRQA.
- Basic Life Support and First Aid; Fire Fighting by KNPC, Kuwait.
- ISO 9001 at Indian Bureau of Management, Bangalore.
- Safety Leadership by Fluor Daniel B.V.
- BBS Observer by British Gas, Chevron- Saudi Arabia (SAC)
- Risk Assessment and Management by Synergy System India (BG).
- Certified on OSHAS 18001 by BV
- Offshore medical certified.
- BOSIET HUET certified (OPITO)
- H2S Certified (OPITO)

IT SKILLS

Language : C++, C, FORTRAN
Software : MS Word, Excel, Medium , HSE people Soft , TapRooT investigation.
OS : Windows 98
Others : ACAD2004, ProE2001

MEMBERSHIP

- Member of American Society of Safety Engineers.
- Member of IOSH UK
- Member of Institute of Engineers (RECT /NIIT Chapter – Trichy, India)

PERSONAL DOSSIER
