Projects

Fingerprint Based Door Locked System using Arm Processor - June 2020

The main aim of our project is to implement the usage of finger print in various authentication systems as fingerprints are a security levels in these types of system are very high. It is designed using LPC1768, R305 fingerprint sensor, keypad, LCD d Lock. In our project we have implemented an ARM processor based security system which makes use of a fingerprint scan entrant

Achievements & Awards

Remote Sensing and GIS - IIRS ISRO(Indian Space Research and Organisation)- 2021

AWS CERTIFIED - ADDRESSING SECURITY RISK-2020

ISEA Certified Cyber Hygiene Practitioner -2021

Certification On C++ (IIT Bombay) - 2018

Certification On DevOps - One Week International Webinar - 2020 - (NIT Nagpur)

Certification On Control Of Mobile Robots- Georgia Institute Of Technology

Certified On AWS Machine Learning -2020

US Embassy English Microscholarship Program- 2015

Certification On Wireless Communication for Everybody - Yonsei University

Certification On Electric Power Systems - University at Buffalo

Vedantu Certified Micro Entrepreneur

Certification of Internship-IMUN-2022

Certification On AI for Everyone - Deep Learning.AI

- Certification On Smart Devices & Mobile Emerging Technologies -Yonsei University
- Certification On Introduction to Intel Distribution Of OpenVINO- Intel
- Certified Top Intern - Best Use Of Social Media IMUN
- Certification On Introduction to Communication Science - University of Amsterdam
- Texas Instrumentation - TI Embedded System Design using MSP430TM MCU MOOC
