Passionate full-stack developer with expertise in backend and frontend technologies. Proficient in database management, authentication systems, and designing REST APIs. Strong problem-solving skills with a dedication to crafting clean and maintainable code.

Professional Summary

- Proficient in Backend development with Java (Spring Boot, JDBC) and Nest.js.
- Experienced in Frontend frameworks: Thymeleaf, React and Angular.
- Skilled in database management: MySQL, Elastic, Postgres.
- Designed and implemented authentication and authorization systems using JWT.
- Experienced in REST API design with user access control.
- Strong OOPs concepts for building well-structured and reusable code.
- Handling different services using Microservices

Projects

Diamond DNA Web-App

- Application to verify stones authenticity through scans and meticulous processes.
- **Technologies:** Nest.js, Postgres, TypeOrm, JWT.

Jewelry Sketches Workflow Web-App

- Application to track the sketch approval journey of jewelry through different departments.
- **Technologies:** Angular, MySQL, Nest.js, Springboot, JWT, Microservices.

Asset Management Web Application

- Manages product inventory efficiently, assigns items to individuals, and ensures smooth product issuance to vendors for streamlined inventory control.
- **Technologies:** JAVA, Spring Boot, Spring Security, Postgres, Angular, Microservices.

LMS Web Application

- Web app for school officials to create tests and teachers to manage student performance records.
- **Technologies:** JAVA, Spring Boot, Spring Security, MySQL, JDBC, Thymeleaf.

Work Experience

Java Developer | Kprise Pvt Ltd (August 2024 - Present)

- Developed highly scalable and secure RESTful APIs using Spring Boot and JDBC, and implemented efficient server-side rendering with Thymeleaf and Bootstrap to create a robust LMS web application that delivers a fast and responsive user interface.

Java Full Stack Developer | MobiOffice Software Innovations Pvt Ltd (March 2023 - July 2024)

- Developed secure APIs for the Jeweller Web-App using Spring Boot and Spring Security, and contributed to the development of the Jewelry Sketch Workflow Web-App by collaborating with cross-functional teams, implementing security measures, and integrating microservices.

Full Stack Web Developer | SamniTech Pvt. Ltd (Part-Time) (Nov 2022 - March 2023)

- Crafted a Full Stack Web-App for Fashion Influencer using React.js for Frontend and Nest.js for backend.

Java Full Stack Developer | Masai School (Internship) (April 2022 - Feb 2023)

Skills

- **Languages & Frameworks:** TypeScript, JavaScript, Java, Spring Boot, Node.js, Nest.js
- **Database:** MySQL, Postgres, Elastic Search
- **Web Technologies:** React, Angular, HTML, CSS, Bootstrap, Tailwind CSS, Material UI, Thymeleaf, JDBC
- **ORM:** TypeORM, Sequelize, Hibernate
- **Other: Microservices, REST APIs, Spring Security**
- **Tools:** Maven, GitHub

Education

- **National Institute Of Technology Silchar, Assam (2017-2021) (B.Tech)**

Hobbies

- Playing Cricket, Badminton, BGMI.

Achievements

- 3 star at CodeChef
- Above 1000 rating in Codeforces
