

Manish Malhotra | Senior Manager of NPD & Strategy Outsourcing

 +91-9711152702 |  manishmalhotra3@gmail.com |  [linkedin.com/in/manish-malhotra-1b9b1512/](https://www.linkedin.com/in/manish-malhotra-1b9b1512/)

A passionate and mission-driven individual with 13 years of experience in managing and growing technology organizations. Well-versed in project management and all stages of product development. Strong leadership and communication skills. Seeking a challenging position that encourages continuous learning, creativity, providing exposure to new ideas, people management and relevant experience to help the company achieve business goals, while sticking to companies' values.

SUMMARY OF QUALIFICATION

- Demonstrated ability to lead cross-functional teams and maintain effective collaborations.
- Well equipped with business operations and process improvement techniques.
- Well-versed in business strategy, project management, and all stages of product development.
- Proven expertise in managing & scaling manufacturing operations.

EDUCATION

- **M.B.A - International Business** , Indian Institute of Foreign Trade –Delhi, India (2013 – 2016)
- **BTech – Mechanical Engineering** , Thapar University - Punjab, India (2004 – 2008)

SKILLS

- **Leadership Skills:** Goal setting, Emotional Intelligence, Prioritization, Motivating Employees, Mentoring and Coaching, Team Decision Making, Consensus-building
- **Management Skills:** People Management, Facilitating Discussion, Employee Engagement, Brainstorming Solutions, Problem Analysis , Quality Function Deployment , Balanced Score Card, Project Management.
- **Technical Skills:** Product Design & Development, Process Design & Re-engineering, NPI/NPD, VA/VE, CAD/CAM Modelling and Simulation, Design to cost (DTC), Value Engineering
- **Quality Techniques:** QFD, FMEA, CFMEA, DFMEA, Six- Sigma, Root Cause Analysis (RCA), Pareto Analysis, Value Stream Analysis, 5S, Kaizen, DMAIC, Process Mapping, Control Charts, 5Why, MOST (Maynard Operation Sequence Technique)
- **Design/ERP Software:** Solid Works, COSMOS, Pro/E- Creo, Wind-Chill, Team Centre, Auto-Cad, Catia V5, Unigraphics, Ansys. ERP- Oracle, SAP

CORE STRENGTH'S

Business , Project & Team Coordination

- Responsible for developing revenue streams in line with company strategy.
- Successfully developed B2B revenue stream with good OEM - all in line with the company objectives and targets.
- Trained in Balanced Score Card to help company achieve its business goals, mission & vision.
- Accountable for Concept Finalization to suit the market requirement and production process.
- Conduct QFD (Quality Function Deployment) for New Product, Project Plans and Schedules, arranging for resources and overseeing all activities to ensure timely completion of Design Project as per budget.
- Coordinating with Production, Quality Control, Vendor Development, Vendor, Pattern Shop and Foundry for developing the chain of task in the manufacturing process of New Product/Modifications in existing products.
- Accountable for Tender Handling and Technical Enquire from Sales persons and Dealers.

Product Design & Validation

- Mechanical Design, Product Design & Development, Process Design, Tool design, NPI/NPD, VA/VE.
- Product concept design & convert to Real Product. Prepare Design documents (Technical drawings, acceptance criteria and product specification).
- Responsible for finalizing & creating CAD 3-D Models of Component ,Assembly ,Drawings ,BOM & Simulation analysis using CAD/CAM .
- Develop Component qualification, Technical checkpoint & to make standardization.
- Maintain Eng. Change Management (ECN/ECR) & Engineering Approval process.
- Finalization of Geometric Dimensioning and Tolerances (GD&T). Selection of Fits between Component and of Assembly, Material Selection and Technical Specifications.
- Create & Maintenance of Bill of Material Structure (Product and its Sub-Assemblies) in ERP/SAP.
- Conducting reviews with respect to the product & component design.
- Engineering calculations, Value engineering, Verification and Product Validation.

- Getting Approvals for the Prototype, Rapid Prototyping, Making necessary modifications in the product and releasing the same for Commercial Production.
- Design to cost (DTC), Value Engineering & Improvement changes in the Existing Product.
- Accountable for Technical Specification of New Product and Management of existing.
- Providing sound technical inputs & engineering support to the team from conception to completion stage of the product design and manufacturing.
- New supplier information survey, audit & qualify.
- Technical discussion with suppliers, sourcing for non-standard items and confirming components from alternative source.
- Vendor Development & Technical Interaction with Vendor & Production, Leading for Prototype Development (Sourcing material, Assembling & Testing)

RELEVANT EXPERIENCE

New Product Development & Strategy Manager – *Hindustan Pumps & Electrical Eng.-Delhi NCR, India.*

Jan 2015 – Present

- Successfully generated & managed a \$400 million budget projects and successfully achieved the project schedule goals.
- Responsible for developing revenue streams in line with Company strategy, Successfully developed B2B revenue stream with good OEM - all in line with the company objectives and target's.
- Well-versed in project management and all stages of product development & validation for Submersible Pumps, Solar Pumps, Centrifugal Surface Pumps, Sewage Pumps and IHP Motors.
- Set and achieve the top-line, middle-line and bottom-line targets within the prescribed budgets while making decisions on Product-Mix, Pricing, and Promotion, etc.
- Providing company Directors with and analysis of market, NPD, competitor intelligence, assisting the Management team in pricing and preparing business plan. Initiates and coordinates development of action plans to penetrate new markets.
- Identify, research, analyze & market new businesses and products while evaluating the business and realizing its full potential.
- Conducts one-on-one review with all Team to build more effective communications, to understand training and development needs, and to provide insight for the improvement of sales team and activity performance.

Senior Design Engineer– *Siemens-Gurgaon, India, August 2011 – December 2014*

- Effectively carried out designing of Generator Stator and its components and release complete drawings with GD&T for mfg.
- Executed and presented Design reviews for stator projects based on designing, detailing and analysis of change.
- Analyze FEA results, implement changes in 3D model and coordinate with concept design team to come up with best optimized design change.
- Worked on Generator Stator and its components design, Stator rewinds which involve the installations of Stator winding, installation of wedges, Series and Phase connectors etc. and released the drawings with GD&T for manufacturing.

Design Engineer – *Stryker, Global Technology Centre -Gurgaon, India, October 2010 – July 2011*

- Accomplished the CFMEA for the Stryker Instruments, Ireland and also done Product design Risk management using tools: Failure mode effect analysis (FMEA)
- Analyzing & updating the product drawings and apply a Geometric Dimensioning and Tolerances on component drawings.
- Analyze the field return failed products and conduct the failure root cause analysis, propose an engineering solution and implement the design change.

Design Engineer – *GE Commercial Motors – By Regal Beloit-Faridabad, India, August 2008 – October 2010*

- Actively involved in the Design and Development of IHP- 3-Phase Induction Motors (on IEC and NEEMA Standards)
- Interacting with customer for technical & functional specifications and understanding high level design requirement of project.
- Concept generation as per client input and prepare supporting documents (Design Plan, QFD, and DFMEA) for Design reviews.
- Reviewing the design for Functionality, Manufacturability, Assembly, Prototyping and Validation.
- Ensure smooth transfer of Design, Drawings, Technical data, Deliverables and Technical reports to the customer for release.
- High Efficiency Model Development: Design and Development of High Energy Efficient EFF1 and Eff2, Models having Performance Best in class.

Production Internship at Automobile Industry – *Maruti Suzuki-Gurgaon, India, August 2007 – January 2008*

- Productivity Improvement of Assembly line of Car in Assembly Shop-2, Assembly Shop-3 by Line Balancing, Cycle Time Reduction, and Manpower Reduction of Assembly line using MOST Technique & LINGO Tool.

Certifications

- Certified with Pro-Engineer Program.
- Geometric Dimensioning and Tolerances (GD&T) & Tolerance stack up Analysis Trained
- Official Training on “FEA Fundamentals in Engineering Design” Held at IIT, Delhi

Achievement & Hobbies

- Won “ The Best Endeavour Award ” for F-1 Car Designing Competition held at Silverstone Racing Track, London (England) Organized by ‘IMechE’ in Formula Student’s –Year 2008
- Reading Technical, Business, Personal Development, Automobile Magazines and Books; Traveling & Meeting new people; Listening to Music, Swimming, Tracking, Playing Lawn Tennis ,Table Tennis , Cycling.
