WHAT MAKES OUR PROGRAM UNIQUE?

NAIL INTERVIEWS WITH TOP TECH COMPANIES

Interact and Learn from mentors working in top product based companies to crack interviews for your dream role

REAL WORK EXPERIENCE WITH STARTUPS

Work with companies directly on software development projects to master your skills and build a strong project portfolio

ASSURED JOB REFERRALS

Our program seeks to eliminate financial risk in the upskilling journey with our guaranteed Job referrals option

PROGRAM DETAILS

PROGRAM ELIGIBILITY

- ✓ Minimum one year of work experience in software development
- ✓ Have a good understanding of basic programming concepts.
- ✓ Working in a service based company and looking to crack coding interviews in product based MNCs and Unicorns.

WHO SHOULD APPLY?

- ✓ Software developers looking to transition into product-based roles in top tech companies
- ✓ CS/IT students looking to land their first role in software development

PROGRAM PREREQUISITE

- ✓ Proficiency in at least one programming language - C/C++/Java/Python/Javascript.

DURATION

WEEKDAY BATCHES: 9 MONTHS

MONDAY to FRIDAY:
2 Hours/Day.

WEEKEND BATCHES: 10 MONTHS

SATURDAY & SUNDAY:
3 Hours/Day

To know more about applicable discount, next batch details.

SCHOLARSHIP DETAILS

Test - 30 minutes.

[APPLY SCHOLARSHIP](#)

Our Trainer

Dhaval Dave

Software Engineer II at Microsoft

Top Skills:

✓ 9+ years of experience in Backend

✓ 2 Open-source contribution

- Alumnus of National Institute of Technology Warangal.
- Problem Solving, Designing, Optimize solution for performance enhancement.
- Research paper selected and Presented in IEEE- ICACCI & TrustCom.

PROGRAM DETAILS

Get to know in detail about our Full Stack Software Development Program

PRO

₹ **95,000**
(+GST)

- ✓ Advanced training modules
- ✓ Earn real-work experience
- ✓ Get 3 years of course subscription
- ✓ Ace Interview Preparation
- ✓ Avail 5+ Job referrals

PRO MAX

₹ **1,35,000**
(+GST)

- ✓ Advanced Training modules
- ✓ Assured Job Referrals
- ✓ Get 3 years of course subscription
- ✓ Get Real work experience
- ✓ Avail unlimited job referrals

ABOUT PROJECT CERTIFICATION

- ✓ Don't just get an Academic Degree, get a work experience certificate from Industry.
- ✓ Work directly with companies to gain real-time work experience and to build a strong project portfolio.

SAMPLE CERTIFICATE

RECOMMENDED BY INDUSTRY EXPERTS

Amritansh
Founder of Neurodynamic AI.

Skillslash is bringing some refreshing changes to the professional training industry. Courses for the industry really needs to come from the industry which is what Skillslash is doing.

Abhas Kumar
CEO at Therox Dynamics

The Skillslash team's core mission of building an affordable up-skilling platform will very likely bring transformative change in the way people look at professional courses.

Arghya Mukhrjee
Associate Director at WNS at Global/CPG & Retail

Skillslash will transform how people approach up-skilling. Their program has an optimal mix of theory and practical learning – but the best part is their collaboration with the industry.

Ankita Ranjan
Senior Analytics Consultant at Accenture

I have been waiting for an industry-driven training program that I can recommend to peers in my company. Finally, this is a solution, I resonate with and can vouch for.

ALUMNI REVIEWS

“

Pankaj Chowdhury

The trainers at Skillslash are quite amazing. The teaching style was simple yet effective. I was able to get into my dream company IBM within 7 months of joining the full stack program. The best part in the program was when they assigned an IBM mentor to help me crack my interview which really gave my preparation a solid boost.

“

Manisha singh

I wanted to brush up my full stack skills when I joined Skillslash program. I had been in a software role and this course helped me improve my weak areas significantly. Mentors were amazing and the interview prep module really helped me become more confident in interviews. Got multiple offers in a period of 3 months, thanks to Skillslash.

“

Muralikrishna Alichetty

The reason I joined Skillslash was because of the Data engineering and Cloud specialisation. The course was quite helpful as I was able to get a Senior DBA role at the end of the program. Interview preparation module was also very helpful as I was able to build a strong portfolio as a result of this.

“

Girish Ballampalli

I think Dhaval has clear understanding of whatever he teach, wheher it is Data Structures, Algorithms, Dynamic Programming, he explains with such ease that even hard problem seems easy. Hats off to his teaching and Dhaval keep on motivating and helping others

“

Anukalp Desai

I have taken data structures and algorithms course taught by Dhaval, he is very accessible and does an amazing job at making difficult concepts easily understandable.

“

Anurag Sinha

Dhawal Sir is a really great mentor. He helped me identify my weak areas and work on it consistently. He was always supportive and his style of teaching kept hinged to my goals. I was able to crack a senior software role as a result of that and I will always be thankful for all his support and guidance.

“

Ankur Singh

The course structure was really good and covered most of the topics like Linked list, trees , graphs, recursion, dynamic programming etc. Dhaval Sir did a great job taking each topic to a great clarity level. Rather than remembering the solution to the problem, he taught me how to approach problem and solve it.

Modules

Module 0 (6 weeks)

Preparatory Sessions & Programming Fundamentals

Module 1 (12 Weeks)

Data Structures and Algorithms

Module 2 (6 Weeks)

System Design in Depth

Module 3 (4 Weeks)

Advance Data Structures & Algorithms

Module 4 (3 Weeks)

Coding Interview Prep for FAANG

Module 5

Electives & Specialization

Module 5 A
(15 Weeks)

Full Stack
Specialization
With Real Work
Experience

Module 5 B
(6 Weeks)

Data
Engineering
Specialization

Module 5 C
(10 Weeks)

Advance
AI & ML
Specialization

Module 5 D
(8 Weeks)

Technical
Engineering
Manager

Module 5 E
(4 Weeks)

Blockchain
Developer
Specialisation

MILESTONES

Electives & Specialization

3+ MONTHS

SYLLABUS

MODULE 0 (6 weeks)

Foundation & Prep Session

Programming Fundamentals (4 weeks)

- Programming Basics, Variables, Conditional statements
- Strings, Lists, Loops and Functions
- Pointers in C, Revision of C/C++/Java/Javascript and Python Syntax
- Basic Mathematics for Programming.

MODULE 1 (12 weeks)

Data Structures and Algorithms

This module helps you to master the algorithms and data structures interview in **FAANG & top product based MNCs**. You will be solving 250+ coding challenges under guidance of expert mentors working in Tier 1 companies like **Microsoft, Amazon, Adobe, Facebook, Google etc.**

- Array basics, Problem solving techniques with example
- Time Complexity & Bit manipulations
- Sorting, Searching & String Algorithms
- Linked list
- Two pointer techniques
- Stack & Queue - Implementation & Problems.
- Tree, Trie, Ternary Search tree
- Heap data structure
- Recursion & Greedy Algorithms
- Combinatorial problems with backtracking
- Hashing
- Graph Theory.
- Dynamic Programming.

Important Note:

- Programming Language Used: **C/C++, Java**
- Total Number of problems to be solved in live class: 120+
- Total coding problems in assignment: 100

MODULE 2 (6 weeks)

System Design in Depth

- **System Design fundamentals**

- OOOD - Object-oriented analysis and design , Design patterns
- CAP Theorem in distributed Computer Systems,
- **Load balancing** - Caching - Distributed And Global Cache,
- CDN, Proxy, Web Socket, Polling
- Database Indexing, Sharding, Normalization, ACID, **SQL vs NoSQL**
- Component Modeling
- Messaging Queue
- **Multithreading** and Synchronization

- **High Level Design With Projects**

- Introduction to common MicroService design patterns
- Microservices & System components in real world
- Event Driven, Domain Driven, **Rest API driven Architectures**
- **3 Real time projects**

- **Low Level Design With Projects**

- OOD and Design Patterns,
- API Design
- DB Schema Design for NoSQL and SQL
- Common LLD and API design questions

Mini Projects :

- Designing Facebook news feed
- Designing web crawler
- Designing Uber Backend
- Designing youtube

Note:

For more end-to-end **Real industry Projects** on system design & Full stack, [refer to Project Section - Page 20](#)

MODULE 3 (4 weeks)

Advance Data Structures & Algorithms

- LRU cache Like Problems
- Advance Tree - Segment tree, Suffix tree, Red black tree, K-D tree
- Advance Dynamic Programming
- Solve 30+ hard level coding interview questions from **FAANG companies**.

MODULE 4 (3 weeks)

Coding Interview Prep

- Build Resume/Linkedin profile to get shortlisted in top tech companies
- Learn Strategy to defend every single skill in your CV
- Understand Hiring process for FAANG and **product based MNCs**
- Sessions on Company wise interview.
- **Company wise Mock interview** from industry expert.
- Meet your personal mentor and career coach for guidance.
- **Salary negotiations & strategy.**
- Get job Referrals in top MNCs and unicorns.

Important Note:

- For every student, **One on one mentor** working in top MNCs will be assigned for next 3 months to guide on interview tips.
- This module **can be attended** after completing electives and specialisation.

MODULE 5

Electives & Specialization

(You can select any **2 electives** based on your career goal & work exp.)

Module 5 - A

Full Stack Specialization With Real Work Experience (15 Weeks)

Frontend Development

- Web development basics - HTML and CSS
- Bootstrap Basics
- Introduction to **Javascript**
- Introduction to **React** Ecosystem
- Modern Javascript For **React**
- Learn **next.js**
- **Advance React** for frontend
- Mastering UI & UX
- Coding Responsive Websites and Webapps

Backend Development

- Introduction to MVC
- Learning Node.js
- **Mongodb** for Developers
- Learning **express.js**
- Building Rest API with node.js and express
- Securing Rest API with **node.js**
- **Java Servlet**, relational database ORM with **hibernate**
- Springboot, building application using **springboot**.
- Build Microservices architecture with node.js
- Docker & **Kubernetes** basics for node.js applications
- Cloud Deployment using AWS.

cont...

Module 5 - B

Data Engineering Specialization (6 Weeks)

- Overview of Data Engineering
- Advance SQL, NOSQL Database using MongoDB
- Hadoop Basics
- Design Data pipeline
- Data warehousing
- **Apache Spark** Fundamentals
- Core data engineering - Staging, Profiling, cleansing, and migrating data.
- 2 capstone Projects

Module 5 - C

Advance AI & ML Specialization (10 Weeks)

- Probability theory
- Statistics foundation
- Exploratory Data Analysis
- Intro to Machine learning
- **Supervised Learning**
- Unsupervised Learning
- Deep Learning Basics
- NLP and Chatbots
- Basics of **Computer Vision**
- 2 Capstone Projects

cont...

Module 5 - D

Technical Engineering Manager (Recommended for > 7 Yrs exp.) (8 weeks)

- Technical Engineering Management Fundamentals
- Technical concepts for Engineering managers
- Digital product lifecycle
- Software Development Project management
- Building a product roadmap
- Software Product Development Frameworks
- Building a product from scratch
- Building team - Hiring tech talent
- How to manage tech teams?
- Launching your Product
- Product management tips.
- Behavioral interviews for Engineering managers

Module 5 - E

Blockchain Specialization (4 weeks)

- Blockchain Basics
- Hyperledger Fundamentals
- Bitcoin & Blockchain Cryptocurrencies
- Introduction to Ethereum
- Smart Contract Basics
- Hyperledger Fabric Basics
- Real time use cases of blockchain in : Fintech, Supply chain, Healthcare etc.

MODULE 6

Work on End to End Projects in Partnership With Startups

We help you to work on projects directly with startups so that you **get real work experience**. You will be building scalable tech products from scratch using full stack technologies and advanced system design concepts. You are recommended to work on **minimum 3-4 projects** end to end and build a project portfolio to **crack coding interviews** in top MNCs with confidence.

REAL - TIME PROJECTS

Project 1

Work with startups to build scalable e-commerce websites like **Amazon**.

Tools/Tech

Mongodb, Express, React, Node , System design concepts

Features

Signin/Signup, Admin panel, Carts, Wishlist, Payment Gateway, managing order, Shipments, Filters, search, Navigation etc.

Outcome

This project work helps you to gain real work experience of building ecommerce websites from scratch by directly working with retail startups.

Project 2

Experience Building **hotel booking apps like Oyo, Airbnb** from scratch.

Tools/Tech

React, Node , Mongodb, Express, System design concepts.

Features

Booking Rooms, cancel booking, Date Range Filters, payment gateway, user dashboard, Admin dashboard etc.

Outcome

You will experience building and designing an end to end complex application using React, Node and mongo.

Project 3

Work like a Full stack developer at **Swiggy/Uber eat** and design a food delivery app.

Tools/Tech

System Design architecture, React, redux, node, Mongodb, Deployment

Features

Cart, Filtering & search, Login/signup, Add to cart, Update items in cart, User authentication, working with orders, order history, admin panel & dashboards.

Outcome

This project work helps you to gain real work experience of building ecommerce websites from scratch by directly working with retail startups.

Project 4

Design and build an **OTT platform like Netflix** with frontend and backend.

Tools/Tech

System Design & Backend architecture, React, node, Mongodb, Deployment, other backend frameworks.

Features

Login, movie recommendations, the home page, users history, billing, customer support etc

Outcome

You will experience building a full fledged OTT platform like Netflix. This will help you to understand the core system architecture and design for tech products and practically apply in real time complex scenarios.

Project 5

Build a scalable **social media app like Facebook** from scratch with all major features and deploy it.

Tools/Tech

React, Firebase, redux, node, Mongodb, Deployment

Features

Feeds, Timeline, walls, like, reaction, comment, share, notification, friends, followers and other features.

Outcome

You will Learn how to build a React project from scratch. Also , you will be able to understand how facebook handles millions of users simultaneously with the help of load balancing, CDN and other system design concepts.

Project 6

Build a scalable chatbot application **like freshdesk** with a recommendation engine.

Tools/Tech

React, Firebase, redux, node, Mongodb, AWS, Machine learning, NLP

Features

Login/signup, Omnichannel Messaging Support, chat handover, sentiment analysis, chatbot analytics, security features.

Outcome

You will Learn how to build a project from scratch using React/Node/Nextjs and other tools.

Project 7

Build project management dashboard **like Trello, Jira.**

Tools/Tech

React, Firebase, redux, node, Mongodb, Deployment

Features

Allocate tasks, add descriptions, deadlines, and attachments, messaging and communications etc

Outcome

You will Learn how to build a project from scratch. Also ,you will be able to understand load balancing, CDN and other system design concepts.
