Career Summary – Total Experience (8 years and 10 month)

A dynamic marketing professional experience in Product Management, Marketing, and Sales. Adept at orchestrating cross-functional teams and skilled in Product positioning, Go-to-Market, Strategy, Business Development, and Network management.

Professional Experience

Tor.ai | Product Manager | India

April 2024 - Present

Tor.ai is India's largest industrial Internet of Things (IoT). My Major responsibilities include managing the entire product roadmap from ideation to market launch, driving, driving innovation, and ensuring our solutions deliver exceptional value to our customers.

- **Leading the development of IOT-based solutions** in the EV space fostering innovation and collaborating with cross-functional teams to deliver high-quality products that meet market needs and enhance customer value.

Mahindra & Mahindra Ltd | Country Manager | Nepal

Mar 2019 - March 2023

One of the leading brands in Nepal offering a wide range of automotive products. My major responsibilities were managing sales & marketing, distribution network, market expansion, product positioning, and conceptualizing & executing marketing strategy.

- Managed and expanded operations of Commercial Vehicle & Construction Equipment businesses in Nepal impacting a revenue of INR 300 million
- lead the distributor's team of 30 individuals covering 15 branches across the country.
- Proficiently handled brand and channel management, with national Expos being one of the standout examples, effectively leveraging distributor resources and cross-functional teams, and ensuring the successful execution of events while overcoming numerous challenges
- Launched a new Product variant "Roadmaster-G90", and achieved 2nd market position in the segment, up from 4th place.
- Conducted comprehensive market research to identify key drivers and influencers and implemented targeted product launches to reach a broader customer base, ensuring maximum market coverage in a shorter timeframe resulting into higher share of business in Nepal market.
- Lead Distributor's business turnaround by managing liquidation risk of INR 340 million by innovating refurbishment support and optimizing spare- parts pricing model.

Mahindra & Mahindra Ltd | Product Manager | Pune, India

Aug 2014 - Feb 2019

My major responsibility was to drive the cross functional team for the development of a new platform "Intermediate & Medium commercial vehicle" from concept to launch.

- New Product Incubation: Led the cross functional team for the successful development of the "Mahindra Furio" a concept to launch project, involving an investment of INR 6,500 million. Responsibilities included New Product Conceptualization, customer insight through primary and secondary research, market sizing and executing go-to-market strategy.
- Product Conceptualization: Conceptualized "India's First 37Ton Tipper" by identifying product gaps, assessing market potential, capturing prospective customer needs, and creating a comprehensive five-year product roadmap.
- Go-To- Market: Managed customer identification and funnelling challenges while identifying application-trial customers for the upcoming ICV platform products during the market shift to BS4, resulting in early feedback of the new technology and timely launch of the product with best-in-class value proposition.
- Product Development: Identified and implemented 14 product improvements in the Heavy Commercial Vehicle space through customer survey and VOC analysis.
