

MUKESH PATIDAR

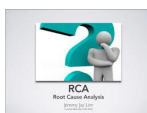

E-Mail: mukeshind@yahoo.com

Phone: + 91-9901303103

PROFILE SUMMARY

- A multi-faceted technical professional with broad spectrum of engineering & business knowledge.
- Self-motivated professional with 18+ years progressive experience in technical marketing & business development of various knowledge based consulting in industry domain in the field of Electrical power system, Plant reliability, Industrial energy optimisation & relevant project management.
- Hands-on experience & in depth know-how of various knowledge domain like, Energy management/Audit, Plant Reliability, Electrical Power system studies, Quality management of High voltage test systems & Design engineering knowledge of High voltage products & overview of various process control solutions, Automation & Control.
- Holds the credit of success in leading the activities associated with planning, formulating and implementing cost benefit analysis of the product, systems & plant reliability.

KNOWLEDGE PURVIEW

Electrical Power Equipment & Power system

- Major equipment purview Power Transformer, Current transformer, Capacitive voltage transformer, Surge arrestors, Switchgears, Generator, HT/LT Motor, Variable frequency drive etc.
- Integrated Asset Management of various industrial equipment including predictive test techniques & preventive strategies.
- Health assessment & condition monitoring of power equipment.

Quality Management of High voltage test system & Insulation testing

- Quality management & Calibration of high voltage test systems as per requirements of ISO/IEC 17025.
- Formulating policies & implementing the same in line with ISO/IEC 17025 for laboratory accreditation as per NABL
- Quality Management of High voltage & insulation test system for products up to 400kV, (CT, CVT, Bushings).

Failure investigations

- Failure investigations of equipment Knowledge of various tool like FMEA, SQC, 7 statistical tools, fish bone analysis, pareto analysis
- Familiar with TQM, TPM, SQC, Maintenance management system & relevant KPIs.
- Participate in new product development projects.

Energy Audits / optimisations

- Energy auditing of various industries like Cement, Integrated steel plant, Pulp & paper, Power Plant, Food & Beverage & commercial establishments etc.
- Experience in demand side management, distributed energy sources, Energy optimisation through process control & VFD applications & Overview of Smart grid concepts
- Knowledge of various industrial equipments & concepts like; boiler, furnaces, compressor, pump, fan, HVAC, turbine, Waste heat recovery, Fuel substitution.
- Measurement & verification for financing in energy efficiency project.
- Renewable energy sources

ABB India Ltd., Bangalore, India

Since December 2012

Global Lead -EIC, OTC Food & Beverage

AVP - Business Development- Energy Efficiency Services - Country Services

About roles & responsibilities:

- Formulate go-to-market strategy for Energy Efficiency, including packaging / bundling / leveraging existing products / engineering service portfolio, addressing white spots / gaps with suitable partnerships / agree with external agencies.
- Monitor and analyse Energy Efficiency market (customers / competitors), technology advancements, regulatory environment, etc.
- Develop / provide inputs for creating innovative, customer focused Energy Efficiency solutions combining the elements across the entire spectrum of ABB's power and automation portfolio.
- Lead & coordinate cross-divisional teams for business planning & order acquisition.
- Customer relationship management, including building strategic partnerships with customers.
- Providing recommendations, review of technical solutions and reviewing energy savings calculations to determine paybacks and incentive levels for customers.
- Conducted Energy efficiency Assessment & Plant operational improvement exercises at various industry sectors. Food & Beverage plants Unilever, Coca-Cola, Amul, Nestle, TGBL at various locations UK, Poland, UAE, Vietnam, India etc.

Previous role

September 2000 – April 2008

- Handling Quality management & testing of High voltage electrical equipment testing laboratory 1000kV Power frequency voltage, 2200kV Impulse test voltage. (Switch gear & control gear)
- Functioned as Team Leader for condition monitoring/System Reliability was involved in detailed testing, investigation/analysis of power equipment condition using various tools & techniques at factory and in field.
- Involved in condition assessment & life assessment of various High voltage electrical equipment (Power Transformer, Instrument transformers, Circuit breakers, surge arrester, motors) on site testing, analysis of results and decision-making thereon. Knowledge of Various test techniques Like RVM, SFRA, DFR, C & Tan delta, Partial discharges, Impulse voltage test, High voltage Power frequency test etc. Knowledge of various IEC standard & other relevant international standards.
- Assisting in design of electrical equipment, insulating material properties, routine and type test requirement of high voltage equipment.
- Providing consulting in field of Electrical power system study, plant reliability & power quality studies.
- Performed failure investigation of power equipment at shop floor & on site.
- Monitoring plant performance assessment and improvement through improving the maintenance practices, overall equipment effectiveness (OEE) and energy optimisation.
- De-bottlenecking of various plant process to increase productivity of the plant.
- Implementation experience of CMMS (Maximo software tool) for industrial asset maintenance management.

PREVIOUS EXPERIENCE

Siemens Ltd., Mumbai, India

August 2008 – November 2012

Manager – Sales & Marketing - Reliability and Energy Optimization - Industry Solutions –VS

Highlights:

- Sales of value added services, Coordination & status monitoring for targets & sales activities.

- Met customers for discussions, understanding requirement & for business development activities.
- Checked & prepared costing for project related to implementation of Energy efficiency improvement & reliability improvement.
- Prepared business proposals / tenders
- Conducted risk review of offers / tenders using local & global tools
- Negotiated with customers
- Defining, assigning and tracking objectives, tasks and providing technical support to execution team.
- Liaising with suppliers and customers in technical and commercial matters.
- Provide technical expertise to improve the operational performance of the equipment.
- Delivery and communication of engineering, reliability and efficiency improvements.
- Development of a reliability programme including reporting, data capture and improvement plan.
- Root cause analysis of technical issues and management of resolution.

ACC Ltd., Thane Head office (Mumbai), India

May 2008 - August 2008

Energy efficiency Coordinator - Energy & Environmental Services

Responsible for development of energy efficiency road map for various plants within the organisation. Lead the plant teams in Defining, assigning and tracking energy efficiency objectives. Support to identify & implement EE projects and providing technical support to plant team.

ABB Ltd., Vadodara, India

September 2000 – April 2008

Sr. Engineer- Corporate R&D (PP)

Manager - Power System Consulting (PS-Con)

ACADEMIC DETAILS

2020	Certified Energy Manager, Association of Energy Engineers USA
2019	MBA- General, Pondicherry University
2015	BEE Accredited Energy Auditor
2007	Bureau of Energy Efficiency (BEE)- Certified Energy Auditor (BEE: A statutory body under Ministry of Power, Govt. of India)
2000	M. Tech (Energy Management) School of Energy & Environmental Studies, D.A.V.V, Indore
1997	B.E. (Electrical Engineering) SSGMCE-Shegaon, Amravati University

PUBLICATIONS / PAPER PRESENTATIONS

- New method of resonance frequency measurement of coupling capacitors in PLCC - Presented at International Seminar on Instrument Transformers at Tech-IT Organised by IEEMA at Mumbai- January 2006
- Optimum harmonic filter solutions for various applications – Presented at 10th Energy Efficiency Summit 2011 organised by CII-Godrej GBC at HICC, Hyderabad –August 2011

TRAINING ATTENDED

- Certified Lead Auditor as per BS EnMS 16001 Energy Management Systems
- One-2-Five Energy -Software for energy health assessment & benchmarking for industry
- Diagnostics of rotating machines by ABB Lenzohm
- Diagnostics of high voltage equipments by Doble engg. Co.
- Energy conservation in utilities by CII, ERDA
- Implementing ISO/IEC 17025 by IIQM, Jaipur
- statistical process & Quality control & improvement by IIQM, Jaipur
- Pro-Engineer, 3-D modelling software

PERSONAL DETAILS

Date of Birth: 23rd June 1975
 Linguistic Abilities: English & Hindi
 Address: Bangalore
