English, Hindi, Urdu

PROJECTS

ENHANCED HOME AUTOMATION SYSTEM —

The proposed system aims at providing complete advanced and intelligent home automation system. HAS monitors and controls home appliances, monitors temperature and humidity parameters, monitors quality of water, detects and prevents fire and leakage of LPG gas, automatic refill request of gas to gas agency and advanced door locking system.

RFID BASED MOBILE CHARGER —

In this project a novel method of charging mobile phones of different manufacturers using solar power has been designed.
