E-mail pankajbkamble@gmail.com	
Date of birth 11 May 1985	

To enhance knowledge and work experience in the areas of design & development and use the same in the manner required for enhancing the overall performance of an organization.

Experience

Jan 2013 - present	Manager (Design & Engineering) thyssenkrupp Industries India Pvt. Ltd,Pune India • Designing of bulk material handling equipments like wagon tippler, side arm charger as per RDSO G33 Rev-1 guidelines. • Correspondence with vendors for different bought out items like gearbox, couplings, brakes, EOT crane for wagon tippler complex etc. • Calculations of wagon tippler torque requirement, side arm charger torque requirement calculations. • Preparation of technical specifications of hydraulic systems for wagon tippler drive, wagon tippler top clamping & side arm charger drive. • Design & development of new product called transfer car & puller cum pusher which will be used at outhaul side of wagon tippler complex. • Technical discussion with hydraulic vendors for review of hydraulic system for wagon tippler, side arm charger & puller cum pusher. • 3-D modeling & analysis of new products called transfer platform & puller cum pusher using FEMAP-Nastran. • Designing the individual conveyors for the capacity & power requirements using Belt Analyst software & different design standards. • Preparation of technical specifications of bought outs items like gearbox, coupling, idler, pulleys, belt etc. • Overall coordination with project & engineering department for scheduling of the detail drawings, specifications of various bought out items, etc. • Guiding & handling a team members for the preparation of G.A. drawings of wagon tippler complex. Detail drawings of wagon tippler, side arm charger, transfer platform. • Co-ordination with vendors for bought out offers during bid & execution of project & try to optimize the entire project cost. • Overall co-ordination with the client for the approval of the layout drawings & documents.
Mar 2011 - Dec 2012	Senior Technical Associate Tech Mahindra Ltd, Pune, India • Working as a Team Lead for the software continuous integration testing project. • Interaction with the client to understand the scope of the project. • Guiding team members for solving the issues & obstacles for the timely completion of project. • Planning, scheduling a project activity for timely execution of the project
May 2007 - Mar 2011	Design Engineer Sandvik Mining and Construction, Pune India • Designing the individual conveyors for the capacity & power requirements. • Have worked on different the tenders during bidding stage for mechanical estimation, steel estimation & overall costing of the project. • Selection of drive components such as the conveyor motors, gearboxes, couplings.

- Selection of the conveyor belt, pulleys, idlers, bearings, etc as per standards.
- Preparation of conveyor pulley bearing shaft diameter calculations & bearing life calculations of idlers for the approval of the client.
- Develop programs for power calculations of belt conveyor, pulley shaft diameter calculations, idler bearing life calculations. etc.
- Co-ordination with vendors for bought out offers during bid & execution of project & try to optimize the entire project cost.
- Guiding a team member for the preparation of the GA drawing based on the selected equipment & the material flow sheet.
- Overall coordination with project & engineering department for scheduling of the detail drawings, specifications of various bought out items, etc.
- Overall co-ordination with the client for the approval of the layout drawings & documents.

Aug 2006 -
May 2007

Trainee Engineer

thyssenkrupp Industries India Pvt. Ltd,Pune India

- Designing of belt conveyor system & perform the design calculations for the conveyor as per standards.
- Correspondence with vendors for different bought out items like gearbox, couplings, brakes, take up winches etc.
- Preparation of mechanical & steel estimation of belt conveyor system during tender stage.
- Selection of drive components such as the conveyor motors, gearboxes, couplings.

Education

Jun 2017 - Jun 2019

Symbiosis Centre for Distance Learning, Pune

- Post Graduate Diploma in Operation Management with first class (66.6 %)

Jun 2002 - Jun 2006

College of Engineering Pune

- Bachelor of Mechanical Engineering with First Class (63.54 %)

Jun 1999 - Jun 2002

Maharashtra State Education Board

- HSC in Science with Distinction (92.17%)
- SSC with Distinction (86.00 %)

Skills

Design & Engineering	
New Product Development	
Vendor Development & Engineering	

Software

Belt Analyst from Overland Conveyors USA (Conveyor Design)	
AutoCAD	
Femap Nastran	
Autodesk Inventor	
SAP	

Certificates

Jul 2016

Completed training on industrial hydraulics from Eaton Corporation
