SUMMARY & RECOGNITION

Data Scientist with 4 years of experience in **Data Science** and **Analytics** domain. Skilled in Python, SQL, Data Analysis, **ML**, **DL**, **CV**, **NLP** and **Generative AI**. Recipient of the **STAR Performer**, **GenAI Innovation Activator**, and 9-time **Client Value Creation** awards.

EXPERIENCE

Accenture, Strategy & Consulting – Data and AI

July 2021 – Present

Data Scientist

Pune, India

1. Skills.AI for Corporate Talent Journey (Domain: Talent and Organization) | Python, NLP, AWS SageMaker

Client Deliveries: Workforce Analysis, Talent Transformation

- Delivered actionable **Insights** through in-depth **workforce analysis** for over 7 clients. Created **Reports** and **Power BI** dashboards to highlight skills distribution and capability gaps, leading to a **30%** increase in strategic hiring and optimizing resource allocation.
- Leveraged **NLP** driven semantic search and **ML** models for multiclass classification to analyze skills distribution and identify capability gaps within the workforce, enhancing Accenture's Human Capital Assets and empowering clients to make data-driven decisions and increasing data accuracy by **24%**.

Asset/Product Development:

- Developed a Semantic Similarity Search Engine for Role & Skill Normalization using **MPNet** sentence embeddings, **RoBERTa**, and Facebook AI Similarity Search (**FAISS**) for efficient matching, achieving **74.5%** accuracy and reducing manual effort.
- Implemented skill goal type classification using **DSpy** with Retrieval-augmented Generation (**RAG**) and **OpenAI** (GPT-3.5 Turbo) API, incorporating chain of thoughts predictors to enhance the accuracy by **12%** and relevance of skill type mapping.

2. Chicago Pacific Founders (Domain: HealthCare) | PySpark, SQL, Databricks, Azure, Git

- Developed **Databricks** notebooks with **PySpark** and SQL, designed **ADF pipelines** for robust **ETL** processes. **Streamlined** data cleansing and transformation across Healthcare layouts, enhancing data accuracy and seamless transitions to higher environments.
- Created and tested complex **Data Validation Queries (SQL)**, collaborated with leadership to rectify flaws, and managed **DDL** operations to meet schema requirements.

3. CPR Product Recommendation (Domain: Retail) | Python, GCP

- Applied **Exploratory Data Analysis** to summarize and visualization on web gathered data to analyze product properties for similar products. Performed Data Preparation, Filtering, and Cleaning to ensure high-quality datasets.
- Developed **Recommendation Engine** and backend **API** endpoints for **ranking**, **trending**, and **product similarity** algorithms using **Flask**, deployed on both **GCP** and **Azure** for scalability.

EDUCATION

Indian Institute of Technology Bombay

July 2019 – June 2021

Master of Technology (M.Tech.) - Geo informatics

CPI – 8.72/10

Pimpri Chinchwad College of Engineering, Pune

August 2012 – June 2016

Bachelor of Engineering (B.E.)

67.60% (First Class with Distinction)

TECHNICAL SKILLS

Python | PySpark | R | SQL | Scala | Pandas | NumPy | Scikit-Learn | SpaCy | NLTK | Keras | OpenCV | OpenAI | Tensorflow | Pytorch | Amazon Web Services (AWS) | Amazon Redshift | AWS Lambda | Microsoft Azure | Google Cloud Platform (GCP) | Langchain | Snowflake | Git | Databricks | Azure Synapse Analytics | ADLS | LLM | Hugging Face | GPTs | Excel | Tableau | Power BI | Looker

CERTIFICATIONS

Microsoft Certified AI-900 Azure AI Fundamentals

Northwestern University - Kellogg: Analytics and Artificial Intelligence

Microsoft Certified DP-900 Azure Data Fundamentals
