CAREER OBJECTIVE: To excel in all the java related technologies and deliver high quality solutions to the clients.

PROFILE:

- Total 14+ years experience into IT industry. 10 years into development and 3+ year into corporate trainings.
- Core Technologies being: Core java, Multithreading, Data Structures, J2EE, MVC Architecture servlets and JSP, Spring MVC, AOP, Security, Hibernate, Web-Services, Multithreading, Code debugging, Manual Testing, Angularjs, Apache Camel, Active MQ, JMS, EJB, Junit, Mockito, QTP, Selenium, Java8, Spring boot, Spring webflow, Design Patterns, SQL, PL/SQL, Java Networking, RMI, QC, Swing, JDBC, html5, CSS, javascript, Spring batch, Microservices, AWS, Spring Boot, Spring Data, Spring Data Rest, Spring Cloud, Docker, Jenkins, Git, CQRS, Event Sourcing, Distributed Transactions, Caching
- Experience into HDFS, Spark. Spark sql, hive , map reduce.
- Have exposure to Cloud computing, Amazon Web services, Android too.
- Worked on all phases of Software Development Lifecycle.
- Exceptional ability to create the project documents as necessary to detail
- Have one year of experience in Cramer. Good knowledge of Resource Manager, Delivery Engine and Task Engine
- Have also worked on 8051 microcontroller for an year.
- Have worked for 2 years each, on manufacturing, telecom and Finance domain.
- Fast learner and implementer.

PROFESSIONAL EXPERIENCE:

Working on a project wherein we have to send user events to Google analytics, using javascript.

Worked on Nodejs, typeorm, graphql to create backend API's

Used terraform to automate the CI-CD for client architecture on AWS.

Dec 2017-> Present

RJT Compuquest

Worked on an ecommerce application used internally using Micorservices Architecture, Spring Boot, Rest, Java 8 , Spring Cloud, JMS, Rabbitmq, Spring, Hibernate , AWS, Docker, Axon Framework, Spring Test. ELK for logs

Dec 2016-> Dec 2017

Working as a freelance Java, J2ee corporate trainer. Delivered trainings to companies like Wipro, Capgemini, clients through HCL Learning, Incedo on all of the above stated technologies.

Accenture

Team Leader (Corporate Trainer)
Nov 2015→ Dec 2016

Joined Accenture in November 2015 where-in my role was to train the experienced as well as the new joiners on java related technologies and make them ready to be deployed on various projects. Other targets involved Content Creation, Examination questions set-up, upgrading on latest technologies and guidance and project support to people deployed on various projects.

Core areas on which trainings have been delivered in past : Spring, hibernate, SOAP and REST web services , java8, multithreading, networking, jsp, servlet, junit, ejb, data structures, oracle, sql, pl/sql, Apache Camel, JMS, ActiveMQ

Ericsson
Telecom Domain
July 2014 -> Feb 2015
Senior software engineer

There I worked on the “Remote device management” project. It was about controlling the remote devices through the use of a sim-card. Project was in the up-gradation stage.

Technologies used: Java, EJB, JMS, Servlets, Spring, JPA, glassfish server, Agile framework

Key responsibilities:

- 1 Pick TRs/ change requests from queue, requirement analysis.
- 2 Development
- 3 Testing, deployment

December 2013 to July had joined a small consulting firm, a contract job in embedded systems.

Blackrock
Finance Domain
Dec 26, 2011 -> Dec 13, 2013
Analyst 3

There the project was on a reporting tool. It included fetching various positions, risk and security data from various servers and displaying them in the form of a report after processing based on various parameters and requirements.

Technologies used: Core java, swing, struts and jdbc. There I got a chance to work extensively on core java, concurrent APIs, multithreading, serialization, collections, reflection, design patterns.

Had also automated my module testing using QTP. Have developed a deep understanding on finance domain and have fair knowledge on various terms like equity, debt, alternate investments, and derivatives.

Key responsibilities:

There I worked as an **individual contributor**. Role included requirement gathering from clients, coding and developing test-cases using Junit.

AMDOCS
Telecom Domain
21st September 2009 → Dec 2011
Senior Subject Matter Expert (Java)
Gurgaon

Client: TCL

Project was on Cramer tools: **RESOURCE MANAGER, TASK ENGINE AND DELIVERY ENGINE**. Dealing with GUIs and writing callouts.

- 1) Worked on Interface module to update the old database of the changes done in the new database and keeping it in sync.
- 2) Worked on fault management system module, to send trouble tickets for problems in the changes to be done for the particular device or service. To identify the problem, and in which port/ equipment it occurs.

For the above projects, my module was to create detailed design document based on High level design, coding, unit testing, system testing and changes as per the requirements.

Technologies used; **JMS, EJB, Struts, JSP, Servlets**

Sub Projects:

Worked on change requests or updating to new technologies.

- 1) Worked recently on Code changes and new functionality added in C/C++ project with UNIX testing.
- 2) Worked on up-gradation of Jdk1.5 to JDK1.6 version with inbuilt **JAXB** libraries and removal of external libraries.
- 3) Creation of interfaces to update the old databases for the changes in the new database.
- 4) Worked on fault management system module, to send trouble tickets for problems in the changes to be done for the particular device or service. To identify the problem, and in which port/ equipment it occurs.

For the above projects, my module was to create detailed design document based on High level design, coding, self unit testing, system testing and changes as per the requirements.

Technologies used were: **JMS, EJB, Struts, JSP, Servlets**

INFOSYS TECHNOLOGIES LIMITED

Manufacturing Domain

April 2009 → September 2009

Software Engineer

Pune

Client : Wachovia

- 1) Development of web-sites using Vignette as the tool. Study of Vignette API's and using them for coding purposes.
- 2) Detailed analysis of requirements.
- 3) Preparation of design documents for creation of web-pages using **JSP, JSTL** and **Vignette tag libraries**.
- 4) Coding.

Dec 2008 → March 2009

Software Engineer.

Bangalore

Client : GMAC

Project was based on online vehicle auction (Smart Auction) and tracking the sales for the vehicles, number of vehicles sold, expired and ones which needed repair or got expired. To generate daily the reports for the vehicles and to send the confirmation mail to the client. The technologies used for database management were **Java and Oracle**. JSF was used for developing online screens. My role was database management.

- 1) Requirement Analysis i.e. analyzing client's requirement.
- 2) Knowledge transfer from Team Leader and Module Leader.
- 3) Making of Design Documents and Test Cases.
- 4) Coding, working on Java and Oracle project. Dealt with database handling.

- 5) Unit Test Coding
- 6) Peer Testing
- 7) System Testing

May 2008 à Nov 2008
 Software Engineer
 Bangalore
 Client: Cisco

The project was based on tracking the requirements for products in various geographical locations, assigning the distributor for the sales and managing all the information regarding sales in the database.

- 1) Development and Maintenance of Sales Applications for Cisco using java and Oracle.
- 2) Development of three Quick Wins, using **Unix and Oracle**. These were small applications using database handling.
- 3) Development of one internal project using coding in **JSP**. It was to track the details of all the employees working in MFGD, their names, project allocated, employee id no, contact details etc.
- 4) Used **SU** as the tool for scheduling the run-time for procedures/jobs.

TRAINING:

Nov2007 → April 2008
 Infosys Technologies Limited
 Mysore

Undergone training in **Java, Unix, sql and Oracle**. That I completed successfully with a CGPA of 4.87 out of 5.

April 2006 → Nov 2007
 Company: Technowave

- 1) I did a course and some live projects on Embedded System using 8051 microcontroller. I learnt about the various hardware components and application of assembly language.
- 2) Made several projects like water-level controller, Hi-tech security system, LCD display **using 8051 microcontroller**.

EDUCATION AND TRAINING:

Pursuing M.Tech in Computer Science Engineering.. Doing it in CS (specialization in OOPS). Have done B.Tech in Electronics and Communication from Dr. K.N.Modi, Institute of Engg. And Technology.

Qualifications		University/ Board	Year of Passing	% of Marks
M.Tech	KSOU		Dec 2016	
B.Tech	UPTU		2007	67
12	CBSE		2002	78
10	CBSE		2000	78

PERSONAL INFORMATION:

Date of Birth: Dec 26' 1985
 Passport #: G5904895
 Languages: English, Hindi
 Hobbies: Solving puzzles, playing computer games.
 B1-B2 USA visa expired.
