SKILLS

Python

Machine Learning

Deep Learning Image processing

Basic C and Java

RoboDK

Tableau

Good Communication skills and Leadership skill

EDUCATION

Bachelor of Technology in Computer science and engineering

Kalasalingam academy of research and education

2021 - 2025

In CSE in the field of Artificial Intelligence with Machine Learning with 9 CGPA

LANGUAGES

Tamil

English

PROFILE

Enthusiastic and dedicated third-year Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning (AIML). Currently pursuing a Bachelor of Technology degree with a passion for leveraging cutting-edge technologies to solve complex problems. With a solid foundation in computer science principles and a keen interest in the transformative potential of AIML, I am eager to contribute my skills and knowledge to innovative projects and collaborative teams in the field.

WORK EXPERIENCE

IBM Skills Build with AICTE | [Bangalore] | May 2023 - June 2023

Student Intern, Artificial Intelligence and Machine Learning (AIML)

Dynamic and results-oriented student intern at IBM Skills Build in collaboration with AICTE, specializing in the field of Artificial Intelligence and Machine Learning.

Engaged in a six-month immersive internship, contributing to cutting-edge projects and gaining hands-on experience in real-world AIML applications.

Key Achievements:

- **Mental Fitness Tracker on ML:** Spearheaded the development of a groundbreaking Mental Fitness Tracker leveraging Machine Learning algorithms. Conceptualized, designed, and implemented a robust solution to track and analyze mental well-being indicators, incorporating sentiment analysis and predictive modeling. The project showcased my proficiency in data science, machine learning, and problem-solving skills.

Responsibilities:

- Collaborated with a diverse team of professionals to understand project requirements and objectives.
- Conducted comprehensive literature reviews and research to inform the design and functionality of the Mental Fitness Tracker.
- Utilized Python, machine learning libraries (e.g., TensorFlow, Scikit-Learn), and data analysis tools to preprocess and analyze relevant datasets.
- Implemented sentiment analysis algorithms to interpret user input and assess emotional well-being.
- Developed predictive models to identify potential mental health trends and provide personalized insights to users.
- Worked closely with mentors and stakeholders to refine project goals and ensure alignment with industry standards.

Skills Demonstrated:

- **Machine Learning:** Developed and implemented machine learning models for mental health analysis.
- **Data Analysis:** Proficient in processing and analyzing large datasets using Python and relevant libraries.
- **Collaboration:** Successfully collaborated with cross-functional teams to achieve project objectives.
- **Problem-solving:** Demonstrated the ability to address complex challenges and deliver innovative solutions.
- **Communication:** Effectively communicated technical concepts to both technical and non-technical stakeholders.

This internship not only deepened my understanding of AIML but also honed my practical skills in project management, collaboration, and problem-solving within a professional setting.

SIVAGNANASEKAR G

AIML STUDENT

WORK EXPERIENCE

• Matlab with AICTE | May 2023 - Nov 2023

Internship Summary: Dynamic and results-oriented student intern with the All India Council for Technical Education (AICTE), contributing to the realm of Artificial Intelligence and Machine Learning (AIML). Demonstrated expertise in MATLAB, successfully completing comprehensive training modules in Intro to MATLAB, Image Processing, Machine Learning, Signal Processing, and applied these skills to a significant project. Engaged in transformative work from June to November 2023, acquiring hands-on experience in the practical application of AIML concepts.

Key Achievements:

- **Technical Proficiency:** Acquired in-depth proficiency in MATLAB, mastering key modules in Image Processing, Machine Learning, and Signal Processing during the internship period.
- **Project Contribution:** Played a pivotal role in a project focusing on [brief description of the project], showcasing the ability to translate theoretical knowledge into practical solutions.
- **Multidisciplinary Exposure:** Gained valuable insights into the interdisciplinary nature of AIML by working on projects spanning diverse applications.
- **Collaborative Learning:** Worked alongside experts in the field, fostering collaborative learning and contributing to the overall success of the team.

Training Modules:

Introduction to MATLAB

Attained a solid foundation in MATLAB, mastering fundamental concepts and tools for subsequent applications.

Image Processing on MATLAB

Developed skills in image analysis, enhancement, and manipulation using MATLAB tools, contributing to a comprehensive understanding of visual data processing.

Machine Learning on MATLAB

Applied machine learning algorithms to real-world problems, gaining practical experience in model development, training, and evaluation within the MATLAB environment.

Signal Processing on MATLAB

Explored advanced signal processing techniques, honing the ability to analyze and manipulate signals for various applications.

Key Skills:

- MATLAB Programming
- Image Processing
- Machine Learning
- Signal Processing
- Project Management
- Collaborative Problem-Solving

SIVAGNANASEKAR G

AIML STUDENT

WORK EXPERIENCE

UCT and Community Service Project | May 2023 - Nov 2023

Dedicated and innovative student intern at Uni Coverage Technology, specializing in Artificial Intelligence and Machine Learning (AIML). During the internship period from May to June 2023, successfully completed a pioneering project in crop yield prediction, showcasing a seamless blend of technical expertise and community service.

Key Achievements:

- **Crop Yield Prediction Project:**
 - Developed and implemented a robust crop yield prediction model using Python and Machine Learning algorithms.
 - Extended the project into a community service initiative, demonstrating a commitment to social impact and leveraging technology for the greater good.
- **Multilingual GUI Implementation:**
 - Expanded the crop yield prediction project by incorporating a user-friendly Graphical User Interface (GUI) in Python.
 - Introduced multilingual support, enabling farmers to interact with the system in their native languages, fostering effective communication and inclusivity.

Impact:

- **Community Service Integration:**
 - Transformed the crop yield prediction project into a community service initiative, providing valuable insights to local farmers for informed decision-making.
 - The multilingual GUI significantly improved accessibility, enabling farmers from diverse linguistic backgrounds to utilize the technology seamlessly.

Technological Proficiency:

- Demonstrated proficiency in Python for machine learning, data analysis, and GUI development.
- Applied machine learning algorithms to address real-world challenges in agriculture, showcasing a hands-on understanding of AI applications.

Collaborative Approach:

- Collaborated effectively with cross-functional teams, emphasizing teamwork and communication skills.
- Successfully bridged the gap between technology and local communities, ensuring the practical relevance of the AIML project.

SIVAGNANASEKAR G

AIML STUDENT

PROJECTS

Dynamic and forward-thinking Computer Science Engineering student, showcasing a proven track record in diverse projects during the second year. Proficient in Java programming, machine learning, IoT, and cutting-edge technologies, with a focus on delivering impactful solutions.

Key Projects:

- **Hospital Management System with GUI (Java):**
 - Designed and implemented a robust Hospital Management System featuring a user-friendly Graphical User Interface (GUI) in Java. Demonstrated a keen understanding of software engineering principles.
- **Stock Price Prediction for Tesla (Machine Learning):**
 - Developed a predictive model using machine learning algorithms to analyze and forecast Tesla's stock prices. Showcased data analysis and machine learning skills, contributing to a comprehensive understanding of financial markets.
- **Smart Irrigation System with IoT Devices:**
 - Implemented a smart irrigation system leveraging IoT devices for efficient water management in agriculture. Showcased expertise in IoT technologies, emphasizing sustainability and resource optimization.
- **Automated Image Captioning (Deep Learning):**
 - Applied deep learning concepts to create an automated image captioning system, demonstrating a fusion of computer vision and natural language processing. Emphasized a multidisciplinary approach to problem-solving.
- **Pick and Place Robot with Conveyor Belt (RoboDK Software):**
 - Designed and simulated a pick and place robot system with a conveyor belt using RoboDK software. Showcased proficiency in robotics simulation, emphasizing automation and industrial applications.
- **Foldable Pen Project (Onshape Software):**
 - Executed a design project using Onshape software to create a foldable pen, emphasizing CAD skills and innovative product development.

Technological Proficiency:

- Advanced skills in Java programming, machine learning, IoT, deep learning, and robotics simulation using relevant software tools.

AIML STUDENT

CERTIFICATIONS

Certification Summary:

Dedicated and results-oriented individual with a comprehensive skill set validated through various certifications, showcasing a commitment to continuous learning and proficiency in cutting-edge technologies.

IBM Skills Build AI Badge and Certificate:

Successfully completed the IBM Skills Build AI Badge and Certificate, demonstrating proficiency in AI concepts and applications. Acquired hands-on experience with IBM technologies to address real-world challenges.

Deep Neural Networks (DNN) using PyTorch by IBM on Coursera:

Attained certification in Deep Neural Networks (DNN) using PyTorch from IBM on Coursera, showcasing expertise in implementing and optimizing deep learning models for diverse applications.

TSCION Communication Skills Certificate:

Earned the TSCION Communication Skills Certificate, highlighting effective verbal and written communication abilities. Demonstrated a commitment to fostering clear and impactful communication in professional settings.

Basic in Python Certificate from HackerRank:

Secured a Basic in Python Certificate from HackerRank, validating foundational programming skills in Python. Proficiency in Python is a key asset for diverse roles in software development and data science.

Data Structures and Algorithms (DSA) Certificate from CodeChef:

Attained the Data Structures and Algorithms Certificate from CodeChef, showcasing strong problem-solving skills and algorithmic proficiency. Demonstrated the ability to tackle complex coding challenges efficiently.

MATLAB Certificates:

- Machine Learning Certificate: Gained expertise in applying MATLAB for machine learning applications, showcasing the ability to implement and optimize algorithms for data analysis and modeling.
- Image Processing Certificate: Demonstrated proficiency in MATLAB for image processing, including image enhancement, segmentation, and feature extraction.
- Signal Processing Certificate: Acquired skills in MATLAB for signal processing, including filtering, spectral analysis, and signal visualization.

Oracle Data Science Professional Certificate:

Achieved the Oracle Data Science Professional Certificate, affirming mastery in data science methodologies, tools, and practices. Proficient in leveraging Oracle technologies for comprehensive data analysis, predictive modeling, and extracting actionable insights.
