Seminar

- SOLAR POWER SATELLITE

Project

Academic Project: Virtual Math Server using Grid Computing The growth of Internet and the availability of powerful computer and high speed network technologies as low cost commodity components have led to using distributed computers as single unified resource called as Grid Computing.

Academic project: Design and Implementation of Security of Big Data Using Multitier Classifier

Multiple classifier analysis, also known as user review mining, has been widely applied to various document types, such as mobile or product reviews, web pages and blogs. Sentiment analysis has caught attention as one of the most active research areas with the explosion of social networks. It is the process of analyzing are extracted from different sources like the comments given on forums, reviews about products, various policies and the topics mostly associated with social networking sites and tweets. Social media technologies take on many different forms including magazines, Internet forums, weblogs, social blogs, micro blogging, social network, photographs, video, rating and social bookmarking. Micro blogging websites have evolved to become source of varied kind of information.
