Weather App

Key Skills: API Integration Front-End Development JavaScript Programming

Using JavaScript, HTML, CSS, and Bootstrap, integrating the RapidAPI Weather API to provide users with accurate weather forecasts for cities worldwide. The app allows users to search for weather information by city and dynamically displays key details such as temperature (in Kelvin), wind speed, visibility, and more. Using asynchronous JavaScript (async/await), the app fetches and displays data in real-time without page reloads, ensuring a smooth user experience. The responsive interface, created with Bootstrap, supports easy navigation between sections and includes robust error handling for API failures.

PUBLICATIONS / RESEARCH / WHITE PAPERS

Advancements in Mortality Prediction Models for Intensive Care Units: A Review of Various Learning Approaches and Clinical Applications

2024 Eighth International Conference on Parallel, Distributed, and Grid Computing (PDGC 2024)

Conducted an extensive survey of existing literature on mortality prediction models, analyzing and comparing various machine learning algorithms, datasets, and methodologies. Evaluated key advancements, challenges, and gaps in predictive accuracy, interpretability, and clinical applicability to inform future research directions in healthcare analytics.

ACHIEVEMENTS

- Gate Qualified and Secured positions in various college quiz competitions.

ASSESSMENTS / CERTIFICATIONS

Industrial Training Program

Key Skills: Python Programming

SEMINARS / TRAININGS / WORKSHOPS

Industrial Training Institute Name: Think next Technologies , Chandigarh
In this industrial Training , i made a project on Employee Salary Calculator using python
