OBJECTIVE

Full Stack Developer with a robust foundation in Java, Data Structures, and Algorithms (DSA), alongside extensive experience in front-end technologies and database management. Equipped with strong teamwork abilities and a solid understanding of industry practices. Seeking to leverage my technical expertise and collaborative skills to design and implement scalable software solutions that integrate front-end functionality with efficient back-end operations. Eager to contribute to innovative projects and drive success in a dynamic development team.

EDUCATION

Bachelor of Engineering (Information Technology) , CSVTU (Bhilai)	2017-2021
12th(PCM) , Vikas Vidyaniketan (Vizag)	2015-2016
10th , Dav Public School (Bilaspur)	2013-2014

SKILLS

Programming and Database Tools	Java, C++, C, SQL, JavaFX, CSS/HTML, Javascript
Coursework	IntelliJ, MySQL Workbench, GitHub
	OOPS, DSA, DBMS, Operating System

PROJECTS

E-Commerce

- The project is called "e-commerce" and aims to build a basic version of Amazon or Flipkart to understand basic functionalities.
- The user can click on clickable areas of the UI to perform actions, and the back-end logic will handle these actions.
- There are several pages for different purposes like login page , cart etc
- Developed this e-commerce platform using Java and JavaFX in IntelliJ.
- Used SQL and MySQL for fluent data handling, ensuring scalability and efficiency in handling multiple concurrent orders.

[Github link for E-commerce](#)

Tic Tac Toe

- Created a dynamic Tic Tac Toe game using Java and JavaFX within the IntelliJ platform, offering an engaging user experience.
- The UserInterface include Visible board with markable boxes and display area with title and player scores.
- It has basic old rules, players can take turns, mark X or O, win with a row, column, or diagonal the first person to do so wins.

[Github link Tic Tac Toe](#)

Snake and Ladder

- Created Snake and Ladder game using java for backend and javaFX for UI.
- Platform used IntelliJ.
- Back end logic include a data structure to represent the board, snakes, and ladders, a die for player movement, and a player with certain properties and it contains player names and update score each time the player wins.

TRAINING

Full Stack Developer Course

- Done full stack web development course from AccioJo.
- This course includes problem solving using DSA a series of coding test and lots of questions related to DSA .
- Developed SQL queries, stored procedures, and triggers to manipulate and retrieve data efficiently
- Applied Java's best practices and design patterns to write efficient and maintainable code.
- Utilized OOPs concepts to enhance code readability, maintainability, and reusability.

EXTRA-CURRICULAR ACTIVITIES AND HOBBIES

- Captain of CBSE clusture Basketball team.
- Have 'A' certificate in NCC.
- Part of parade in Natinal Days during school time.
- My Hobbies are Photography, Travelling (Exploring new places), Playing outdoor games.
