EDUCATION

Bachelor of Arts

july 2019– May 2022

From:- Panjab University

PGDCA

August 2022-october 2023

From:-Hartron

Industrial Training

Data Science with Python (6Months)

From:-ThinkNext Technology Private Ltd.

LANGUAGE

English

Hindi

Punjabi

ABOUT ME

Highly motivated and detail-oriented fresher with a Bachelor of Arts degree, seeking a Data Analyst position. Strong foundation in data analysis, visualization, and reporting. Skilled in developing and implementing data collection systems, identifying business needs, and creating predictive models that improve forecasting accuracy.

EXPERIENCE

Front Desk Receptionist

Jan.2023 - Jan.2024

British Counsel ,Chandigarh

PROJECTS

Heart Disease Prediction:-

In this project, we have to predict the presence of heart disease in a patient. This is a classification problem with input features as a variety of parameters, and the target variable as a binary variable, predicting whether heart disease is present or not.

Customer Churn Prediction:-

- Description:- Developed a machine learning model to predict customer churn using logistic regression. Achieved an accuracy of 85%.

- Skills Used:- Python, Pandas, Scikit-Learn, Jupyter Notebook.

Sentiment Analysis of Customer Reviews (Python):-

- Conducted sentiment analysis on a dataset of customer reviews for a product.

- Used natural language processing techniques to determine positive and negative sentiments.

Customer Sales Analysis :-

1.Performed data cleaning and manipulation.

2.Performed exploratory data analysis(EDA) using pandas,matplotlib and seaborn libraries .

3.Improved customers experience by identifying potential customers across different States, occupation, gender and age groups.

4.Improved sales by identifying most selling product categories and products., which can help to plan inventory and hence meet the demands.

SKILL

- Data Analysis :- Proficient in analyzing large datasets to draw insights and support business decisions.

- Technical Skills: Familiar with SQL, Python, and Excel for data manipulation and analysis.

- Data Visualization :- Experience with tools like Tableau and Power BI to present data insights effectively.

- Statistical Methods :- Understanding of statistical methods and data distribution to analyze trends, make forecasts, and provide reports on data findings.

- Data Manipulation :- Pandas, NumPy

- Data Visualization :- Matplotlib, Seaborn

- Database Management :- SQL

- Machine Learning :- Scikit-learn

-Tools :- Jupyter Notebook
