Academic Profile

- M. C. A. from MATS University, Raipur, Chhattisgarh.
- B. C. A. from SMU, Bokaro Steel City

• Experience

- Currently working as a **Assistant Lead Software Engineer-QA in Extrieve Technology private limited** since 2016 to till date.
- Worked as **Intern in, Xtroniit Solutions**, Gurugram, 2016.
- Training in Core Java from JavaTPoint, 2018.

Technical Skills:

Operating System	:	Windows 7, Win-10, Windows Server 2008 R2
Test Automation Tool	:	Selenium Web driver
Language Used	:	Core Java
Web Debugging Tool	:	XPath, Firebug, Fire path
Defect Tracking Tool	:	Bugzilla 3.2, Issue Tracker, SharePoint
Version Control	:	Tortoises SVN, Git
Data Bases	:	SQL Server
API Testing tool	:	Postman

Projects Profile:

Project#1

Project : IDEA-RL (Retail Liability)

Role : Team Member

Description:

IDEA application will capture all the required data and information from Scanning of the Document and normalize the data and send customer details to core banking system and open more than 100 account within few second. The workflow IDEA application start with scanned batches process by image reader application image reader application identify the account type like saving, current, NRSB, NRTD, TD, RD, Eage and KYC based on template and assign the category AOF (account opening form) processing with respect to the double blind data entry, Hold processing during data entry and mismatches in data entry being routed to an Authorizer (QC user) , hand off files generation from data throw exporter application for 100 AOF in single set and reverse file processing of reverse files in the Export and Sweeper steps.

Responsibilities:

- Involved in preparation of functional test cases as per functional requirement specifications.
- Involved in Executing Test Cases as per System Requirements.
- Involved in the Manual testing and reported the bugs.
- Involved in Functional, Sanity, Smoke & Regression Testing.
- Record and track issues logged into the defect-tracking system using Jira.
- Communicating with other team's members (Development Team, Technical Support, Business Support) to resolve the issues.
- Preparation of Daily / Weekly status report.

Environment:

Asp.net, VB Script, Oracle Berkeley DB, Windows 7, SQL Server, XML, IIS & Web Service

Project#2:

Project Name : Smart Account Opening (BAO)

Role : Team member

Description:

Smart account opening / BAO Account opening applicable for Saving and Current account opening using the mobile application. We extract all the information from SQL data base and create the csv file Sets. A daemon agent, Gen BAO CSV Downloader is executed to download the sets FTP/SFTP, and local folder then create a case/work item in system. Gen BAO CSV Validator application validate the files for completeness, valid file format, valid count of fields in each file and to store the data of each transaction provided in the Transaction control file in separate xml files. Data of each XML runs through the business rules - errors are tagged. Post successful data validation hand off files generation from data throw exporter application, and a daemon agent Gen BAO Output Uploader generates the output files for SUCCESS and REJECTS records and exports the same to the designated SFTP/FTP/local Folder.

Responsibilities:

- Performed various black box testing Methodologies Like ECP & BVA & Security Testing.
- Involved in creation of test cases for Functional Testing.
- Defect Reporting and Tracking using Bugzilla 3.2.

- Extensively performed Manual Testing process to ensure the quality of the software.
- Preparation of Daily / Weekly status report.

Environment:

Asp.net, VB Script, Oracle Berkeley DB, Windows 7, SQL Server, XML, IIS & Web Service

Project#3:

Project Name : RL (CCIF)

Role : Team member

Description:

CCIF (Combine Customer Instruction form) enable user to update 14 instructions like address change, contact change, Pan updating, Utility bill pay, SMS alerts, net banking, SMS banking, Email alert & SI update, nominee update etc. in a Single form for four different Systems /accounts like Demat, Trading, Load & Liability accounts. Idea will capture all required information from the form and sends the data to 4 different systems for customer details updating.

Responsibilities:

- Involved in creation of test cases for Functional Testing.
- Defect Reporting and Tracking using issue Tracker.
- Extensively performed Manual Testing process to ensure the quality of the software.
- Preparation Test cases.

Environment:

Asp.net, VB Script, Oracle Berkeley DB, Windows 7, SQL Server, Oracle SQL, Axis server, XML & IIS.

Project#4:

Project Name : IDEA RAS

Role : Team member

Description:

Idea RAS application enable bank to store their disbursed loan document in a centralized location. RAS application workflow start with scanning, recognition of document, Indexing signature and Photo Cropping then publish the work item and archiver application generate the URL for that proposal number for future reference.

Responsibilities:

- Involved in creation of test cases for Functional Testing.
- Extensively performed Manual Testing process to ensure the quality of the software.
- Preparation Test cases.

Environment:

Asp.net, VB Script, Oracle Berkeley DB, Windows 7, Oracle SQL , XML & IIS.

Project #5

Project Name : IDEA SME, LAG, LOS

Role : Team member

Description:

This application enable bank to provide loan for small medium enterprises, loan against gold and loan originating system. Application workflow start with scanning, indexing then publish workitem and repfeeder application generate the URL for that proposal number for future reference.

Responsibilities:

- Involved in creation of test cases for Functional Testing.
- Extensively performed Manual Testing process to ensure the quality of the software.
- Preparation Test cases.

Environment:

Asp.net, VB Script, Oracle Berkeley DB, Windows 7, Oracle SQL , XML & IIS.

Other Projects: HDFCLTD, DEMAT, Reliance Home Loan Finance
