Hiking and Trekking | Travelling

Team Sports

Experience

Associate Consultant

Capgemini

05/2021 – present | Mumbai, India

I worked seamlessly with cross-functional teams, demonstrating Agile expertise, leading feature development, ensuring on-time project delivery, upholding code quality, adapting to change, and emphasizing continuous improvement and effective communication.

Projects

McDonald's

Mobile Application

02/2022 – present

- Designed a project with MVVM Architecture with Network calls with Retrofit, Dagger-Hilt, and Local Caching with Room.
- Improved code readability, maintainability, and performance by applying best practices of code refactoring.
- Reduced code complexity and duplication by extracting common functionality into reusable modules and functions.
- Enhanced testability and reliability by introducing unit tests, code coverage, and static analysis tools.
- Integrated PayPal as a payment option using PayPal REST API.
- Implemented features such as checkout, payment confirmation, using Braintree SDKs.
- Integrated Venmo as a payment option using Adyen.
- Integrated 3D Secure Cards as a payment option.
- Implemented card verification, authentication, authorization, and chargeback prevention using Adyen SDK.

Chatting Application

08/2021 – 11/2021

- developed a text based messaging app to communicate in realtime.
- Implemented features such as registration, login, profile, password reset, email verification using Firebase Authentication.
- Ensured security and data synchronization using Firebase Realtime Database, Firebase Storage, and Firebase Cloud Messaging.
