EDUCATION

Dr. A. P. J. Abdul Kalam Technical University
Electronics and Communications Engineering Bachelors
Percentage: 73.7%

Lucknow Uttar Pradesh
July 2019 - June 2022

Board of Technical Education UTTAR PRADESH
Electronics Engineering Technical Diploma
Percentage: 75.19%

Lucknow
July 2015 - June 2018

EXPERIENCE

Jamtech Technologies Pvt Ltd | DevOps Engineer

Lucknow | July 2024 - Present

- Set up CI/CD pipelines using Bitbucket Pipelines, GitHub Actions, CircleCI, and Jenkins to automate web application deployments.
- Managed cloud infrastructure on AWS and DigitalOcean, deploying and optimizing services like EC2, Lambda, S3, Route 53, RDS, and Droplets for performance, security, and scalability and utilized Cloudflare for CDN and DNS management.
- Utilized Terraform for Infrastructure as Code (IaC), automating the deployment of 2-tier and 3-tier applications for consistent infrastructure management.
- Worked with Docker and Kubernetes to manage containerized applications, ensuring scalable and efficient production environments.

Sas One Pvt Ltd | Junior DevOps Engineer

Lucknow | Dec 2022 - May 2024

- Automated various tasks using Python and Shell scripting for backups, reducing manual workload and increasing team efficiency.
- AWS EC2 deployments, enhancing content delivery and system uptime through Nginx optimization and load balancing with AWS ALB (Application Load Balancer).
- Created Azure Virtual Machine with Windows server and configure the network routes to Deploy Python Flask APIs, setup of SQL Server Management Studio on it and get public access of those

Cyrus Electronic Pvt Ltd | System Engineer

Lucknow | September 2018 - July 2019

- Designed a Raspberry Pi-based weather station using Python for data collection, LCD display, and remote monitoring via IoT platforms, showcasing hardware interfacing and sensor integration skills.
- Developed an automated Indian Railways announcement system using Orange Pi, Python, and Pandas for real-time data processing, enhancing passenger experience.

SKILLS

Programming Languages: Python, Shell Scripting

Tools / Platforms: Git, Jenkins, CircleCI, Bitbucket Pipeline, GitHub Actions, Nginx, Apache2, Linux, Windows, AWS, Azure, DigitalOcean, Docker, Kubernetes, Terraform, Cloudflare Workers

PROJECTS / OPEN-SOURCE

Next.js Deployment CI/CD Pipeline | [Link](#)

GitHub Webhook, Jenkins, Docker, ECR, EKS

- I have developed a CI/CD pipeline to deploy a Next.js application on a Kubernetes cluster. The pipeline ensures that the app deployment proceeds only if the build is successfully created.

Django Deployment on EKS Cluster | [Link](#)

GitHub, Jenkins, Docker, ECR, ALB, Route53

- Set up a CI/CD pipeline for a Django application that automates testing, building, and deploying to a Kubernetes cluster while ensuring monitoring, security scanning, and rollback capabilities

Two-Tier Architecture using Terraform | [Link](#)

AWS (EC2, RDS, VPC, ALB), HCL

- Designed and deployed a highly available two-tier architecture on AWS using Terraform, featuring EC2 instances behind an Application Load Balancer for the web tier, and a MySQL RDS instance in a private subnet for the database tier, ensuring scalability and secure communication across subnets.
