#### WORK EXPERIENCE

##### Infosys Consulting Services: Agile Business Analyst

Mar, 2022 – Jan, 2024

- In my role as a Agile Business Analyst at Infosys, I collaborated with stakeholders to gather and analyze business requirements, translating them into functional specifications.
- I conducted thorough research and analysis to identify business needs, risks, opportunities, use cases, and user stories.
- I also discussed and presented my observations directly to the clients and discussed the future requirement.
- I also performed testing and quality assurance activities to ensure the successful delivery of projects.
- Moreover, I was effectively involved in bug or defect tracking, reviewing, and reporting using tools like Jira.
- Ensured smooth functioning of IT systems by conducting regular reviews and updating processes as needed.
- Coached fellow team members about Agile principles and best practices, strengthening overall performance as an integrated unit.

##### State Street Corporate Services: Senior Associate

Jun, 2019–Feb, 2022

- I gather requirement on how Nostro Account Reconciliation works.
- Understand various MT103, MT 202, MT 202 Cov, MT 192, MT199, Chips, Fedwire, BACS, FPS, SEPA payment, MT202 & MT103 cancellation messages functionality and its flow, in order to implement GPP migration and conducts UAT testing.

##### Eclerx Financial Services: Senior Analyst

Jun, 2019–Feb, 2022

- Performing Trade Confirmation and research for FX, CDS, IRS products.
- Liaison with traders, Trade Support Group, Confirmation team to streamline the process and conduct MIS Reporting.
- Engagement with automation team to remove redundant and repetitive activities.
- Enhanced team productivity with streamlined processes for data management and reporting.
- Ensured regulatory compliance by adhering to industry standards and legal requirements in all transactions.

#### PROJECTS EXPERIENCE

##### Regulatory Requirements (HKMA)-Bond Tokenization through VAs:

- To get real-time balance update, to get pay in and Pay out integration, to fetch ad-hoc and schedule reports,
- Participate in API integration by building a new layer which will communicate with various channels and helps to deliver the real time update to client without interacting to the source application.
- Client gets benefit to market the use case of using Virtual account and resolve the issue to get real-time balance update, bond trading and reporting.

##### Payment Transparency Requirements:

- Ultimate debtor details Transparency in OBO payment -
- Provide a POC to the PO how the solution works and pulling the ultimate debtor details from the Database and pushing the same information to downstream application.
- Impact Analysis with the change in downstream application.
- Rigorous testing and automation of the test case in the SIT.
