EXPERIENCE

Software Developer

IntelliH Analytics Software Pvt. Ltd., Inc

Nov 2022 – Ongoing

Kolkata, India

- Building Virtual Healthcare Web app using Python, and MySQL.
- ETL data from EMR and train an ML model using Docker
- Use PySpark for Data orientation in a DataOps project
- Create a AI powered chat bot which resolve patient query related to symptoms of disease and provide a second opinion to the patient from existing medical record.
- Working on CI/CD pipelines and do debugging and testing.
- Data preprocessing by Programmatic labeling and do Data Extraction from a unstructured data using pretrained NLP tools.
- Build MFA Authentication like(Google/Facebook Authentication) and integrate several method like stripe/paypal and UPI.

Flask

Python

CNN

MySQL

Mathematics Faculty

Allen Career Institute

July 2019 – Nov 2022

Ahmedabad, India

- Work on Allen plus App where student and teacher connect to each other in covid times.

Software Engineer

The Coding School

Oct 2020 – Sept 2021

Ahmedabad, India

- Work with the MIT Researcher on Projects.
- Debug the Visualization Model using Python, Numpy and Pandas.

Software Engineer

Sunrise Technology

June 2018 – Sept 2018

Meerut, India

- Building solution for legacy system to make them faster by implementing and designing optimal algorithm.
- Algorithm Design and Analysis and Data Structure.

PROJECT

Zapier Application

- Build a application that boost your productivity using python, PyTorch, Sci-kit and Deep Learning.
- Zapier application of Open AI for discord, Here is the link for demo: [Project Demo](#)

Stock price predictor

- Develop Buy/Sell signal based on Macd/ VWAP crossover and build a pnl visualization for a portfolio as risk management

LinkedIn Job Application

- Build a autonomous model that assist in Job Application over LinkedIn using Python, ML, Selenium and RPA. [Project Demo](#)

SKILLS

Language: C++, Javascript, Python

Backend: Flask, MongoDB, PostgreSQL, MySQL, CI/CD pipelines

ML Tools: Pandas, NumPy, R, Statistics, scikit-learn, PyTorch, MLOps, LLM, Langchain, Databricks, PySpark, Keras

Deployment AWS Sagemaker

Microservices tools: Docker, RabbitMQ

Data Visualization: Power BI, Tableau

APIs Development: RESTful APIs, GraphQL

Testing: A/B Testing

Cloud Platform: AWS, Azure

Version Control: Git

Product development: Agile

EDUCATION

IIT Dhanbad

B.Tech in CE

Sept 2015 – June 2019

MOST PROUD OF

Top 1% in IIT Exam

to take a sinking ship and try to make it float

Participate in Open source contribution

Created the code which use by million of user on internet

IBM Summer School Advocate

Quantum computing program where we proposed and design the algorithm for quantum Computing

Summer Undergraduate Research

Worked in the research under the supervision of Dr. Amit Sharma faculty of IIT Delhi

CERTIFICATION

IBM Qiskit Advocate

Inspire by DST GoI(Govt. of India)
