---

**CAREER OBJECTIVE:**

Looking forward for a challenging Industrial Automation career where I can utilize my knowledge and explore my skills that integrate towards the mutual growth and benefits.

**PROFESSIONAL EXPERIENCE @Husky:**

- **CSM – Software and Controls Designer** in ‘Husky Technologies’ from November-2019 to Present (3 Years 6 Months)

**ROLES AND RESPONSIBILITIES:**

- ✓ Design & Development of VB and Dotnet platform projects.
- ✓ Develop PLC program in Twincat and design HMI from Visual basic for user interface in Visual Studio.
- ✓ Design Hot Runner Mold configuration for various Mold heats and Nozzle tips.
- ✓ Global Remote support for Injection molding machine Projects online installation and troubleshooting.
- ✓ PC based control system and IPC software Upgrades to latest processor and core.
- ✓ Knowledge in Injection Molding Machines functionality.

**SOFTWARE SKILLS:**

- ✓ Beckhoff IPC or PLC - Twincat System Manager, Microsoft Visual Studio 2013, Microsoft Office, Acronis tool and VMWare
- ✓ Basics of VB and working knowledge in Visual studio TFS.

**PROFESSIONAL EXPERIENCE @FLSmidth:**

- **Design Engineer** in ‘FLSmidth Private Ltd’ from August-2019 to October-2019 (3 Months).

**ROLES AND RESPONSIBILITIES:**

- ✓ Design & Engineering of Automation Software Systems for Cement & Minerals industries in METIS Software (FLSmidth owned).
- ✓ Installation and Start-up QCX/Robolab Equipments - Applications for Laboratory System

**PROFESSIONAL EXPERIENCE @ELDAC:**

- **Sr.Project Engineer** in ‘ELDAC Process Automation’ from May-2015 to August-2019 (4 Years 4 Months)

**ROLES AND RESPONSIBILITIES:**

- ✓ Design and develop the Automation Control system (in AutoCAD) of PLC I/O Circuits, Power and Control Circuits for Various Process, Chemical, Automotive and Building Industries.

- ✓ Project Handling – Electrical AutoCAD Design, Panel costing, BOM Preparation, IO list Preparation, Panel Testing, Site Installation and Commissioning, Final As built Documentation for the Projects.
- ✓ Loop test, Factory Acceptance Test (FAT), Site Acceptance Test (SAT) Preparation, Test Report Management and analysis for Panels and Various Electrical and Electronics Products.
- ✓ PLC Programming Logic Sequence Developing and Control Testing for various PLC's.
- ✓ Strong Knowledge of Products VFD, Thyristor, Signal Conditioners, Energy Monitoring Devices, Current Sensing Switches, AC & DC Current Transducers, Current Transformers, Lightning Surge Protectors, Remote I/O, PID Controllers and Paperless Recorders.
- ✓ SCADA, HMI Screen Development, Report Generation, Trend Analyzing of Process Industries -Data Acquisition for Single and Batch Process Automation
- ✓ IoT Gateway and Industry 4.0 based Projects.
- ✓ Offers quotations to the customers, sales and support.

#### **SOFTWARE SKILLS:**

- ✓ Siemens (S7-1500-ET-200 SP, S7-1200, S7-200 & 200Smart), Schneider Electric (TM200), Delta (DVP-10SX), Mitsubishi (FX3U, FX3G), Omron (CP1E)
- ✓ SCADA : Simatic WinCC (Siemens)
- ✓ HMI: Siemens (SIMATIC HMI - KTP700 BASIC), Schneider Electric (HMIGXU5512), Exor-eSMART (04, 07, 10), Delta (DOP-BO3), Messung (Smartline Jr.Ex), Weintek.
- ✓ Communication Protocols: Modbus-RS485, RS422, and RS232, TCP/IP Ethernet, Ethercat, Profibus, Profinet and Foundation field Bus.
- ✓ Develop Web server based Data Acquisition, IO Mapping, data transfer to Servers, Data logging and collecting data from various protocols.
- ✓ Develop the Process Monitoring, Trend Development, Alarm & Recipe, User friendly screens, Process cycle operation and password protected screens in HMI

#### **CERTIFICATION COURSES:**

- ✓ Distributed Control Systems(DCS) – CENTUM CS3000
- ✓ Programmable Logic Controller(PLC) – PROSAFE-RS
- ✓ Supervisory Control and Data Acquisition(SCADA) – STARDOM, FASTTOOLS
- ✓ Field Instruments
- ✓ Foundation Field Bus

Successfully Completed and Certified in 'YOKOGAWA INDIA LTD' CHENNAI.

#### **PROJECTS:**

##### **1. Voltage Monitoring System using Web Server**

**Client: National Institute of Wind Energy (Customer: MeteoPole Renewable Energy Pvt Ltd)**

**Description:** Monitor and Controls the Power Supply (24V DC) to the device in offshore using DL8 Webserver via Network from satellite Modem.

- ✓ DL8 – Web Server (M-System)
- ✓ Voltage Controller

##### **2. BTU - Sintering Furnace Control System**

**Client: Carborundum Universal Ltd, Hosur**

**Description:** Control the different zone temperature of the furnace by Auto PID Tuning and control the speed of the conveyor running inside the furnace by controlling the drive as per the process requirements. And PLC Ladder sequence for Alarms and Recipe selection for more products.

**Roles and Responsibilities**

- ✓ Installation and Commissioning of Sintering Furnace Control System.
- ✓ PLC- Siemens - S7-1500 - ET 200SP, HMI-Simatic KTP700 Basic Panel.
- ✓ AutoCAD Design for Panel GA, Power Circuit and PLC I/O Circuits.
- ✓ Factory Testing and Inspection of PLC Control panel
- ✓ Develop the PLC Ladder logic Sequence as per the process, PID Tuning, Alarms logic, Recipe selection.
- ✓ HMI Process Status Screen, Analog Scaling, Alarm History, Process Overview, IO Status, Conveyor speed calibration, safety temperature band, Recipe selection.

**3. Tunnel Kiln DAQ System (Industry 4.0 Project)**

**Client:** Carborundum Universal Ltd – Bonded Division, Hosur

**Description:** Tunnel Kiln – Heater Application. It has 3 segments – Pre heating, Soaking and Cooling. The parameters are Temperature of each zones, Pressure, flow and status of pumps and motors. Need to monitor all the data in a centralized system and configured to their LAN.

**Roles and Responsibilities**

- ✓ Installation and Commissioning of Remote IO's and IoT gateway
- ✓ Using Remote I/O all the parameters are wired in a single place.
- ✓ Using Modbus TCP/IP protocol, have configured in Exor IoT module and got all the data's from Remote I/O in IoT
- ✓ 2 Ethernet ports are configured as different network – One for Remote I/O and another for LAN
- ✓ User friendly Screen development and trend pages to see the data's in Web server via Intranet in company's network.
- ✓ All parameters are configured to logging in SD card and can move to USB whenever we need.

**4. Hot Water System Control Panel**

**Client:** Armstrong International Pvt Ltd, Mahindra City-Chengalpattu

**Description:** To control and maintain the Hot water in a specific Degree Celsius for the Pharmaceutical Industry. In this Project, Temperature transmitters, Pressure transmitters, Flow transmitters and EMECH Control Valves are used to maintain the stability of the hot water. Circulation Pump and Pressurization Pump were in run mode each by 8 hours separately.

**Roles and Responsibilities**

- ✓ AutoCAD Design of Power and Control Circuit for Auto/Manual Control and PLC Circuit
- ✓ Factory Testing and Inspection of PLC Control panel
- ✓ Develop the PLC Sequence as per the process and Customer Requirement.
- ✓ PLC - Schneider Electric (TM200), HMI - Schneider Electric (HMIGXU5512)
- ✓ Configuration of Danfoss drive and Read drive parameters in PLC through RS485 Modbus communication and displays the parameters in HMI
- ✓ HMI Process Status Screen, Pump selection, PID setting, Alarm History, Process Overview, IO Status, Pump trend page, Cycle time setting
- ✓ PID control through PLC for the Pumps
- ✓ The Values are read through Modbus register address mapping from BMS.
- ✓ Preparation of Final As built detailed Documentation with HMI User Manual

## 5. Remote Data Monitoring through Wireless for STP Plant

**Client:** Chettinad Cement Corporation Ltd, Ariyalur

**Description:** COD, BOD, pH values (4-20mA) from STP has been transmitted through wireless modem to DL8 (M-System) in Central Control Room (CCR) and the values are monitored and wired to PLC as AI from DL8 AO card. Then values are monitored in DCS to keep Environment safe.

### Roles and Responsibilities

- ✓ Installation and Commissioning of Remote IO's and Wireless Modems.
- ✓ Device configuration in Remote IO and DL8 Web Enabled DAQ system (M-System)
- ✓ IP Address setting and Wireless Modem Configuration

## 6. TPR (Thermo Plastic Rubber) Machine Automation

**Client:** Unisol India Pvt Ltd, Chennai

**Description:** Developed PLC logic sequences and User friendly HMI Screens for single and double color TPR sole from Injection molding Machine.

- ✓ PLC – Siemens S7-200 Smart
- ✓ HMI - KTP700 BASIC

### INDUSTRIAL EXPOSURE:

Project on 'CASE PIPE DRILLING MACHINE – MOTION BASED APPROACH', at Titan Industries Ltd. – Watches Division, Hosur. The following are the key learning's,

- ✓ Practical knowledge on working of sensors
- ✓ Co-ordination between Electrical/Electronic controls with Hydraulics and Pneumatics Motion Controller applications and basics

### EDUCATIONAL PROFILE:

- ✓ **Bachelor of Engineering** in the stream of **Electronics and Instrumentation Engineering** (2009-2013) in Adhiyamaan College of Engineering, Hosur with **7.85 CGPA** aggregate.
- ✓ **Higher Secondary Certificate - HSC** (2009) in Tagore Matric. Hr. Sec. School, Deviyakurichy, Attur with **86.5%** aggregate.
- ✓ **Secondary School Leaving Certificate – SSLC** (2007) in Dr. Navalar Nedunchezhiyan Matric. Hr. Sec. School, Tittagudi with **73.3%** aggregate.

### PERSONAL INFORMATION:

Father's Name : N.Gunasekaran  
Mother's Name : G.Devaki  
Date of Birth : 3<sup>rd</sup> November 1990  
Gender : Male  
Nationality : Indian  
Languages Known : Tamil, English (Knows to read, write & speak), Hindi (Knows to Read)

I hereby declare that the information enclosed above is true. I will be able to prove myself as an asset to your organization.
