SUMMARY

Currently pursuing ePGP in **Data Science and AI** from IIIT Bangalore, I am a skilled data scientist and automation professional with **6+ years of experience** in Python programming, Machine Learning and Data Analytics. I am adept at seamlessly integrating into multi-disciplinary teams fostering effective **collaboration among technical and business stakeholders**. My hands-on experience includes diverse projects in exploratory data analysis, NLP, and automation of testing processes. I have also contributed in **hiring & upskilling the team**.

PROFESSIONAL EXPERIENCE

MULTI COMMODITY EXCHANGE, Mumbai | Senior Data Analyst Aug 2023 – Mar 2024

- Built a Random Forest Regressor Model to predict Monthly Platform Usage, achieved **MAPE of 7.2%**
- Provided valuable insights to Business teams by building 3 Tableau dashboards tracking monthly and quarterly trends like Commodities Volume change, Price changes etc.
- Researched and evaluated **Anomaly detection** techniques ranging from Isolation Forest, Clustering, PCA, DBSCAN
- Automated Test Cases including the Regression Test Suite to reduce error rate by 13%
- Actively participated in conducting **10+ Interviews** and New Hire Trainings, and managing team building initiatives

WIPRO LIMITED, Pune | Senior QA Engineer Sep 2021 – June 2022

- Optimized and built 30+ SQL and Python programs to achieve a 16% increase in efficiency
- Conducted Database Testing and raised more than 20 Bugs, partnered with development team for resolution
- Performed testing for XML notifications by querying 50+ database tables and checking the same in Message Viewer for upstream applications
- Performed API testing on financial services application through SOAP UI by sending the appropriate requests and checking the responses received
- Trained 20+** new hires on advanced SQL and data management principles, covering topics such as Window Functions

QUEST INTEGRITY SERVICES, Pune | QA Automation Engineer June 2017 – Aug 2021

- Developed more than 15 automation scripts utilizing Selenium WebDriver and Java within a Data-Driven Framework
- Coordinate with program and development management teams in product development lifecycle to confirm end user product and quality requirements
- Established JIRA as a project management tool in a **team of 50+** & educated members on agile principles
- Received **Recognition awards** for Collaboration, Innovation, Customer Focus & Sense of urgency

COMPUTER SCIENCE TUTOR, Mumbai Aug 2008 – May 2017

- Taught Computer Science curriculum to grade XI & XII, covering topics such as Computer Systems, Programming, Networks & DBMS.

MAINFRAME DEVELOPER, Mumbai Aug 2004 – July 2008

- Worked as Mainframe Developer at various organizations and played an important role in the design, development, & maintenance of critical mainframe applications
- My tenure as a Mainframe Developer equipped me with a solid foundation in mainframe technologies & methodologies, along with proven abilities in problem-solving, teamwork, & project delivery.

SKILLS

Technical: Python | SQL | Java | Tableau | AWS | PySpark | Hadoop | Django | Selenium WebDriver | Mainframes
Interpersonal: Task organization and prioritization, project management, agile methodology and leadership
